JCAB Invites Speakers to the 16th Airport Technology

Presentation Session

This is to inform you that Civil Aviation Bureau, Ministry of Land, Infrastructure, Transport and Tourism (MLIT) will hold the 16th Airport Technology Presentation Session on Nov. 26 (Thurs.) – 27 (Fri.) 2015 and is now calling for speakers.

Back in 1967, this session was started as the “Airport Civil Engineering Works Presentation Session” to coincide with the start of the Five-Year Plan for Airport Development, and then was renamed to “Airport Civil Engineering Technology Presentation Session” which had been continued for over three decades. Along with the technological advancement and diversification, it again renamed to “Airport Technology Presentation Session” in 2000, in order to establish integrated technologies for airports, reflecting the achievements in civil engineering, architecture and machinery fields. And this year’s 16th Presentation Session will eventually become the 50th session.

Although various types of airport constructions and technologies have been presented at the previous sessions, airport technologies will continue to be developed.

In commemoration of the 50th session, JCAB will invite personnel engaged in services at the airport to deliver a presentation in a wide range of areas including improvement projects, technical developments and the latest findings in general airport technologies, under the basic concept of the “Trends in Technology that Underlie Airports”. For presentation guidelines, please see the attached “Requirements for Application”.

Requirements for Application

◆ **Theme of Presentation** Improvement, development, construction work or research outcome relating to airport technologies

◆ **Conditions of Application** A speaker shall participate in the session and make a presentation in Japanese on the following dates. He or she is also responsible for all travel costs to participate in the session.

• **Dates:** Nov. 26 (Thurs.) 2:00–6:00PM (tentative time schedule)
27 (Fri.) 10:00AM–4:00PM (“)
