

## VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic / Import Vehicles

CAMPAIGN No.	Gai-2449	DATE	2017/2/23
MANUFACTURE	Daimler AG (Japanese Importer : Mercedes-Benz Japan Co., Ltd. )		
DESCRIPTION OF DEFECT	On certain E-Class (212 platform), S-Class (222 platform) and SL (231 platform) vehicles might have been equipped with electric power steering control units with improperly welded contacts. If the pins inside the control unit would not be welded properly, a permanent electrical connection of the contacts could not be ensured. Should the pins completely lose contact, this could result in deactivation of the electric power steering, which could lead to an increased risk of a crash.
