# Trend Report of the Values of Intensively Used Land in Major Cities - Land Value LOOK Report -

36th Issue - Third Quarter of 2016

Trend from July 1, 2016 to October 1, 2016

Ministry of Land, Infrastructure, Transport and Tourism November 2016

#### Survey Outline

#### 1. Survey objective

To clarify those land value trends of intensively used districts in major cities on a quarterly basis, which tend to indicate property market trends leadingly.

#### 2. Matters to be surveyed

Licensed Real Property Appraisers (LRPAs) collect information on the real property markets of the surveyed districts, and estimate land value trends by using real property appraisal approaches to value. The results are to be aggregated by the Ministry of Land, Infrastructure, Transport and Tourism.

#### 3. Surveyed districts

Those districts in three major metropolitan areas (Tokyo, Osaka and Nagoya areas) and other major cities, land price trends of which are particularly important in the real property market. A total of 100 districts, including 43 districts in Tokyo area, 25 districts in Osaka area, 9 districts in Nagova area, and 23 districts in other major cities, are surveyed. (See the attached sheet for the outlines of the districts.). Residential districts comprise of districts intensively used for high-rise apartments, etc. (32 districts). Commercial districts comprise of districts where shops and/or offices are intensively concentrated (68 districts).

- \*1. Tokyo Area = Saitama, Chiba, Tokyo, and Kanagawa Prefectures; Osaka Area = Kyoto, Osaka, Hyogo, and Nara Prefectures; Nagoya Area = Aichi Prefecture
- \*2. In the first quarter of 2012, the following two changes were made for this survey: (a) new seven districts (Near Morioka Station, Near Itsutsubashi, Near Koriyama Station, Koishikawa, Near Tokyo Skytree Station, Near Shinagawa Station East Exit, and Near Hankyu Nishinomiya Kitaguchi Station) replaced seven old districts (Near Takasaki Station, Near Tsukuba Station, Higashi Ginza, Hongo/Yushima, Osaki, Hamamatsu Station Kita, and Near Hanshin Nishinomiya Station); and (b) the category of the Ikeshita district was switched from commercial to residential.
- 3. In the first quarter of 2013, Karuizawa was replaced by In front of Nagano Station as one of commercial districts outside the three major metropolitan areas.
- \*4. In the first quarter of 2014, Shibaura and Ebisu were replaced by Ariake and Aomi/Daiba.
- \*5. In the first quarter of 2015, Odori Koen, Hakodate Honcho, and 48 other districts were removed to reduce the sample size of the survey to 100.
- 36. In the first quarter of 2016, Nishicho/Sogawa was replaced by Near Toyama Station as one of commercial districts outside the three major metropolitan areas.

#### 4. Survey period

Four times a year - January 1, April 1, July 1 and October 1

#### 5. Organization in charge of survey

The Japan Real Estate Institute

#### 6. Explanation of surveyed items

Overall evaluation: LRPAs estimate the land values of representative locations within the surveyed districts by using real property appraisal methods. The quarterly rate of change for each location is expressed by way of nine classifications (\*Note 1).

: Decrease (exceeding 0% but less than 3%) : Decrease (3% or higher but less than 6%)

\*Note 1

: Increase (6% or higher) :Increase (3% or higher but less than 6%) :Increase (exceeding 0% but less than 3%)

: Decrease (6% or higher but less than 9%) : Decrease (9% or higher but less than 12%) : Decrease (12% or higher)

Surveyed items: The quarterly trends of the following factors affecting the land value trends in the surveyed districts are evaluated and described by a LRPA in the three classifications (\*Note 2).

\*Note 2

 $\triangle$ : Increase, rise

□: Unchanged

**▽**: Decrease, fall

Transaction Price: Prices of traded real estate (land, or land and building complexes) in the surveyed district.

Cap Rate: Cap rate of real estate (land, or land and building complexes) transactions in the surveyed district.

**Transaction:** The number of real estate (land, or land and building complexes) transactions in the surveyed district.

**Real estate for investment:** The number of real estate provided for investment.

**Office rent:** Office rents in commercial districts. Store rent: Store rents in commercial districts.

Value of condominiums: The value of condominiums in residential districts.

**Apartment rent:** Apartment rents in residential districts.

# Survey Results

#### 1. General Trend

- We monitored 100 intensively developed districts in major cities and found the following changes in land value during the third quarter of 2016 (from July 1, 2016 to October 1, 2016) [numbers in the previous survey in square brackets]:
  - > Increased in 82 [88] districts, stayed flat in 18 [12] districts, and declined in 0 [0] district.
  - Slightly over 80% [close to 90%] of the total districts witnessed an increase in land value.
  - The 82 increasing value districts can be broken down in the following way by increase rate:

| Increase Rate | ]                         | Distr | <u>icts</u>   |
|---------------|---------------------------|-------|---|
| 6%+           | Two commercial districts  | :     | Taikoguchi (Nagoya City) and Namba (Osaka City)   |
| 3% to 6%      | One residential district  | :     | Miyanomori (Sapporo City)   |
|               | Nine commercial districts | :     | Ekimae Dori (Sapporo City); Chuo 1-Chome (Sendai City); Ginza Chuo (Chuo Ward, Tokyo); Nihon-bashi  |
|               |                           |       | (Chuo Ward, Tokyo); Shinjuku 3-Chome (Shinjuku Ward, Tokyo); Near Kanazawa Station (Kanazawa City); |
|               |                           |       | Meieki Ekimae (Nagoya City); Shinsai-bashi (Osaka City); and Near Hakata Station (Fukuoka City)     |
| 0% to 3%      | Remaining 70 districts    |       |   |

- We believe that the continuing large proportion of districts with rising land value was mainly caused by the factors described below:
  - > The easy monetary policy of the Bank of Japan generated a favorable financing environment, which allows to maintain current strong investor appetites for real estate; and
  - Major metropolitan areas recently saw the following phenomena in the real estate market: (a) a continued recovery of the office leasing market with improved vacancy rate; (b) a number of ongoing, large-scale real estate development projects; and (c) a high level of shopping and lodging demand by foreign tourists visiting Japan.
- Additional comments on the latest survey results are as follows:
  - > One district in the Tokyo metropolitan area, Shin Urayasu (Urayasu City), witnessed a move of its value change category from flat to the 0% to 3% increase;
  - In the Tokyo and Osaka metropolitan areas, the following three districts saw a smaller value increase rate compared with the previous survey: Ginza Chuo (Chuo Ward, Tokyo), Near Kyoto Station (Kyoto City), and San-nomiya Ekimae (Kobe City);
  - In the Tokyo area, the land value growth rates of the following seven residential districts turned flat from positive figures: Bancho (Chiyoda Ward, Tokyo), Tsukuda/Tsukishima (Chuo Ward, Tokyo), Shinagawa (Shinagawa Ward, Tokyo), Toyosu (Koto Ward, Tokyo), Futako Tamagawa (Setagaya Ward, Tokyo), Kichijoji (Musashino City), and Tachikawa (Tachikawa City); and
  - The 18 districts of flat land value are broken down as follows: ten districts in the Tokyo area (eight residential districts and two commercial districts), one residential district in the Osaka area, and seven commercial districts outside the three major metro areas.

#### 2. Trend by Area

- Three Major Metropolitan Areas (77 districts)
  - > Tokyo area (43 districts): positive growth districts (33 [39] districts, over 75% of the total); flat districts (10 [4]); no negative district (the number of positive growth districts fell by six while that of flat districts increased by six)
  - Osaka area (25 districts): positive growth districts (24 [24], almost all the districts); flat districts (1 [1]); no negative district
  - Nagoya area (9 districts): positive growth districts only, for 14 consecutive quarters since the second quarter of 2013
- Outside the three major metropolitan areas (23 districts): positive growth districts (16 [16], about 70% of the total); flat districts (7 [7]); no negative district

#### 3. Trend by Land Use

- Out of 32 residential districts, land value increased in 23 [29] and remained flat in 9 [3] districts. Over 70% of residential districts saw a rising value movement. As mentioned above, one district registered a larger land value growth rate compared with the prior quarter: the land value of Shin Urayasu (Urayasu City) grew by 0% to 3% in 2016Q2.
- Among 68 commercial districts, land value increased in 59 [59] (more than 85% of the total commercial districts) and stayed flat in 9 [9] districts. Three districts showed a smaller land value increase rate than the previous quarter: Ginza Chuo (Chuo Ward, Tokyo) became classified in the 3% to 6% rise category; and Near Kyoto Station (Kyoto City) and San-nomiya Ekimae (Kobe City) joined the 0% to 3% rise category this time.

<sup>\*</sup> First Quarter = Jan. 1 - Apr. 1; Second Quarter = Apr. 1 - July 1; Third Quarter = July 1 - Oct. 1; and Fourth Quarter = Oct. 1 - Jan. 1.

<sup>\*</sup> Number of districts; its percentage in parentheses.

<sup>\*</sup> A pink cell indicates the largest number in each area/total for each quarter; and an orange cell indicates the second largest number.

Note 1: We did not survey 4 districts (3 in Sendai City and 1 in Urayasu City).

Note 2: We changed 7 monitored districts (3 in Tokyo Metro Area, 1 in Osaka Metro, and 3 outside the three largest metro areas) and regrouped 1 district in Nagoya Metro from commercial to residential. As a result, we surveyed 2 less commercial and 2 more residential districts compared to the prior report.

Note 3: We replaced 1 commercial district with a new district outside the three major metropolitan areas.

Note 4: We switched 1 commercial district and 1 residential district with 2 new districts in Tokyo Metro.

Note 5: We removed 50 districts (38 commercial districts and 12 residential districts) from the survey.

Note 6: We replaced 1 commercial district with a new district outside the three major metropolitan areas. We did not survey 1 district (Around Shimotori in Kumamoto City).

# Number of Districts (Residential and Commercial Combined) by Land Value Change (by Area(Tokyo area))

<sup>\*</sup> First Quarter = Jan. 1 - Apr. 1; Second Quarter = Apr. 1 - July 1; Third Quarter = July 1 - Oct. 1; and Fourth Quarter = Oct. 1 - Jan. 1.

Note 1: We did not survey 4 districts (3 in Sendai City and 1 in Urayasu City).

Note 2: We changed 7 monitored districts (3 in Tokyo Metro Area, 1 in Osaka Metro, and 3 outside the three largest metro areas) and regrouped 1 district in Nagoya Metro from commercial to residential. As a result, we surveyed 2 less commercial and 2 more residential districts compared to the prior report.

Note 4: We switched 1 commercial district and 1 residential district with 2 new districts in Tokyo Metro.

Note 5: We removed 22 districts (16 commercial districts and 6 residential districts) from the survey.

<sup>\*</sup> Number of districts; its percentage in parentheses.

<sup>\*</sup> A pink cell indicates the largest number in each area/total for each quarter; and an orange cell indicates the second largest number.

# Number of Districts (Residential and Commercial Combined) by Land Value Change (by Area(Osaka area))

|            | The third quarter of 2016  | 1 (4.0%)     | 1 (4.0%)                         | 22 (88.0%)                       | 1 (4.0%)   | 0 (0.0%)                         | 0 (0.0%)                         | 0 (0.0%)                         | 0 (0.0%)                          | 0 (0.0%)      | 25  | (100.0%) |

<sup>\*</sup> First Quarter = Jan. 1 - Apr. 1; Second Quarter = Apr. 1 - July 1; Third Quarter = July 1 - Oct. 1; and Fourth Quarter = Oct. 1 - Jan. 1.

Note 2: We changed 7 monitored districts (3 in Tokyo Metro Area, 1 in Osaka Metro, and 3 outside the three largest metro areas) and regrouped 1 district in Nagoya Metro from commercial to residential. As a result, we surveyed 2 less commercial and 2 more residential districts compared to the prior report.

Note 5: We removed 14 districts (10 commercial districts and 4 residential districts) from the survey.

<sup>\*</sup> Number of districts; its percentage in parentheses.

<sup>\*</sup> A pink cell indicates the largest number in each area/total for each quarter; and an orange cell indicates the second largest number.

# Number of Districts (Residential and Commercial Combined) by Land Value Change (by Area(Nagoya area))

<sup>\*</sup> First Quarter = Jan. 1 - Apr. 1; Second Quarter = Apr. 1 - July 1; Third Quarter = July 1 - Oct. 1; and Fourth Quarter = Oct. 1 - Jan. 1.

Note 2: We changed 7 monitored districts (3 in Tokyo Metro Area, 1 in Osaka Metro, and 3 outside the three largest metro areas) and regrouped 1 district in Nagoya Metro from commercial to residential. As a result, we surveyed 2 less commercial and 2 more residential districts compared to the prior report.

Note 5: We removed 5 districts (4 commercial districts and 1 residential district) from the survey.

<sup>\*</sup> Number of districts; its percentage in parentheses.

<sup>\*</sup> A pink cell indicates the largest number in each area/total for each quarter; and an orange cell indicates the second largest number.

Number of Districts (Residential and Commercial Combined) by Land Value Change (by Area(areas other than Tokyo, Osaka and Nagoya areas))

|             | The third quarter of 2016  | 0 (0.0%)     | 5 (21.7%)                        | 11 (47.8%)                       | 7 (30.4%)    | 0 (0.0%)                         | 0 (0.0%)                         | 0 (0.0%)                         | 0 (0.0%)                          | 0 (0.0%)      | 23  | (100.0%) |

<sup>\*</sup> First Quarter = Jan. 1 - Apr. 1; Second Quarter = Apr. 1 - July 1; Third Quarter = July 1 - Oct. 1; and Fourth Quarter = Oct. 1 - Jan. 1.

<sup>\*</sup> Number of districts; its percentage in parentheses.

<sup>\*</sup> A pink cell indicates the largest number in each area/total for each quarter; and an orange cell indicates the second largest number.

Note 1: We did not survey 4 districts (3 in Sendai City and 1 in Urayasu City).

Note 2: We changed 7 monitored districts (3 in Tokyo Metro Area, 1 in Osaka Metro, and 3 outside the three largest metro areas) and regrouped 1 district in Nagoya Metro from commercial to residential. As a result, we surveyed 2 less commercial and 2 more residential districts compared to the prior report.

Note 3: We replaced 1 commercial district with a new district outside the three major metropolitan areas.

Note 5: We removed 9 districts (8 commercial districts and 1 residential district) from the survey.

Note 6: We replaced 1 commercial district with a new district outside the three major metropolitan areas. We did not survey 1 district (Around Shimotori in Kumamoto City).

<sup>\*</sup> First Quarter = Jan. 1 - Apr. 1; Second Quarter = Apr. 1 - July 1; Third Quarter = July 1 - Oct. 1; and Fourth Quarter = Oct. 1 - Jan. 1.

Note 1: We did not survey 4 districts (3 in Sendai City and 1 in Urayasu City).

Note 2: We changed 7 monitored districts (3 in Tokyo Metro Area, 1 in Osaka Metro, and 3 outside the three largest metro areas) and regrouped 1 district in Nagoya Metro from commercial to residential. As a result, we surveyed 2 less commercial and 2 more residential districts compared to the prior report.

Note 4: We switched 1 commercial district and 1 residential district with 2 new districts in Tokyo Metro.

Note 5: We removed 12 residential districts from the survey.

<sup>\*</sup> Number of districts; its percentage in parentheses.

<sup>\*</sup> A pink cell indicates the largest number in each area/total for each quarter; and an orange cell indicates the second largest number.

# Number of Districts (All Areas) by Land Value Change(by Use(Commercial districts))

<sup>\*</sup> First Quarter = Jan. 1 - Apr. 1; Second Quarter = Apr. 1 - July 1; Third Quarter = July 1 - Oct. 1; and Fourth Quarter = Oct. 1 - Jan. 1.

<sup>\*</sup> Number of districts; its percentage in parentheses.

<sup>\*</sup> A pink cell indicates the largest number in each area/total for each quarter; and an orange cell indicates the second largest number.

Note 1: We did not survey 4 districts (3 in Sendai City and 1 in Urayasu City).

Note 2: We changed 7 monitored districts (3 in Tokyo Metro Area, 1 in Osaka Metro, and 3 outside the three largest metro areas) and regrouped 1 district in Nagoya Metro from commercial to residential. As a result, we surveyed 2 less commercial and 2 more residential districts compared to the prior report.

Note 3: We replaced 1 commercial district with a new district outside the three major metropolitan areas.

Note 4: We switched 1 commercial district and 1 residential district with 2 new districts in Tokyo Metro.

Note 5: We removed 38 commercial districts from the survey.

Note 6: We replaced 1 commercial district with a new district outside the three major metropolitan areas. We did not survey 1 district (Around Shimotori in Kumamoto City).

| Okinawa    | Naha        |                | Kenchomae                                       | Commercial     | Near Kenchomae Station on the Okinawa City Monorail Line. Semi-developed commercial area with mid-to-high-rise office buildings mainly along Onaribashi-dori Street and Kokusai-dori Street.  |

# Comparison between Two Government Land Value Surveys and Land Value LOOK Report

| Item  | Land Value Survey by Central Government<br>(Land Value Publication)  | Land Value Survey by Prefectural Governments   | Land Value LOOK Report  |
|---|--|--|---|
| Major Objectives                                  | - Yardstick for land transactions among individuals and corporations - Benchmark for appraisal by Licensed Real Property Appraisers (LRPAs) - Basis for the calculation of the purchase price of land used for public works - Basis for tax assessment of land value etc.  | - Gauge for the review of a transaction price under the National Land Use Planning Act - Benchmark for the calculation of the purchase price of land based on the National Land Use Planning Act etc Almost the same objectives mentioned in the left column   | To indicate the leading trend of land values in major cities by identifying the value movement of intensely developed districts   |
| Organization in Charge                            | Land Appraisal Committee, Ministry of Land,<br>Infrastructure, Transport and Tourism (MLIT)  | Prefectural governors  | Land Value Research Division, Land Economy and Construction and Engineering Industry Bureau, MLIT   |
| Description of<br>Monitored Land                  | A representative parcel of land in terms of land use, environment, and other features in its district (excluding the regulated area stipulated in the National Land Use Planning Act if applicable), in which a similar type of real estate development is found due to its prevailing natural and socio-economic conditions | A representative parcel of land in terms of land use, environment, and other features in its district (excluding the regulated area stipulated in the National Land Use Planning Act if applicable), in which a similar type of real estate development is found due to its prevailing natural and socio-economic conditions | Districts which are intensively developed with high-rise residential buildings, retail shops, and office buildings and which usually show a leading land value trend  |
| Sample Size                                       | 25,270 standard sites (2016 Survey)  %A total of 15 standard sites were temporarily took out from the survey. Those sites are located in the exclusion zone of Fukushima Dai-ichi Nuclear Power Plant.   | 21,675 standard sites (2016 Survey)  XA total of 31 sites were temporarily excluded from the survey. Those sites are located in the exclusion zone of Fukushima Dai-ichi Nuclear Power Plant (28 sites) and in the area hit by the Kumamoto Earthquake of April 2016 (3 sites).  | 100 districts   |
| Published Figure                                  | The market value of each standard site as of January 1   | The market value of each standard site as of July 1  | The quarterly land value change rate of each district as of January 1, April 1, July 1, and October 1 (nine rate ranges)  |
| Location of Monitored<br>Land                     | - The City Planning Area of each municipality - Area designated by the MLIT based on its expected active land transactions   | Throughout all 47 prefectures  | Intensively used land in Tokyo, Osaka and Nagoya Areas and second-tier cities   |
| Survey Method                                     | Two LRPAs are retained for the appraisal of each standard site. The Land Appraisal Committee at MLIT examines the result, adjusts it if necessary, and determines the market value of the site.  | One LRPA is retained for the appraisal of each standard site. The Prefectural Governor examines the result, adjusts it if necessary, and determines the market value of the site.  | One LRPA estimates the land value movement of each district by roughly following the approaches to value employed in real estate appraisal, in addition to collecting information on the trend of the real estate market of the district. |
| Contents of Survey<br>Findings to be<br>Published | For each standard site, its value per square meter, size, shape, etc. are published on the Japanese Official Journal, newspapers, and the MLIT website.  | <ul> <li>For each standard site, its value per square meter, size, shape, etc. are published by the prefecture.</li> <li>MLIT complies nationwide land values and posts them on the website and newspapers.</li> </ul>   | The quarterly land value change rate of each district is published based on the nine rate ranges.   |
| Legal Basis                                       | The Land Value Publication Act   | The Administrative Order for the National Land Use<br>Planning Act   | -   |
|   | -  |  |   |
