

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic / Import Vehicles

CAMPAIGN NO.	4181	DATE	January 25 ,2018
MANUFACTURER	ISUZU MOTORS LIMITED		
DESCRIPTION OF DEFECT	<p>In some of the heavy-duty truck engines, the heat and pressure generated by combustion repeatedly act on the walls of the piston combustion chambers and cause damages, some of which accumulate and develop into cracks. Therefore, if the trucks are continuously used without repairs, these cracks in the walls of the piston combustion chambers might develop into holes, which, in the worst case, might lead to lowered engine outputs and white smoke emissions, eventually making the vehicles undrivable.</p>
