

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic / Import Vehicles

CAMPAIGN No.	Gai-2631	DATE	2018/3/29
MANUFACTURE	Daimler AG (Japanese Importer : Mercedes-Benz Japan Co., Ltd.)		
DESCRIPTION OF DEFECT	On certain G-Class vehicles (463 platform) with V8 biturbo gasoline engine (M176), the vacuum hose for the brake booster might have been manufactured outside specification, whereby the interior wall of the four layer brake booster hose might detach. Thus, the vacuum supply of the brake booster might be constrained whereby the brake force support would be reduced and the brake pedal would need to be applied with higher force. As a result, the braking distance could be extended.
