

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	4309	DATE	Aug. 2 2018
MUNUFACTURER	Mitsubishi Fuso Truck and Bus Corporation		
DESCRIPTION OF DEFECT	<p>(1) On some light duty trucks and buses, since the maintenance setting of the centrifugal filter in the positive crankcase ventilation system is inappropriate, if the engine is idled for a long time or the engine oil is not maintained appropriately, contamination in the engine oil may accumulate and cause the filter to clog. If the vehicle continues to be used in this condition, the pressure in the crankcase may rise, letting engine oil to flow into the intake and exhaust systems, and cause white smoke. In the worst case, problems such as unexpected rise in the engine speed will occur and result in engine damage or a fire.</p> <p>(2) On some light duty trucks and buses, since the engine oil replacement interval was set incorrectly, if the vehicle continues to be used without changing the oil at the specified interval, the engine oil level may become too low. If the engine oil is not maintained by daily inspections etc., shaking of the timing chain may increase, and cause abnormal noise or insufficient output. In the worst case, the timing chain will break and the vehicle will be unable to run.</p>
