|-----------------------|--|------|--------------|
| CAMPAIGN No. | Gai-2701 | DATE | Aug 21, 2018 |
| MANUFACTURE | Harley-Davidson Motor Company (Japanese Importer : Harley-Davidson Japan K.K.) | | |
| DESCRIPTION OF DEFECT | DOT 4 brake fluid not being flushed for a prolonged period of time beyond the 2-year maintenance schedule specified in the Owner's Manual and Service Manual, leading to the formation of gel and, eventually, deposits on certain brake components. If these deposits happen to form on the apply valve in the ABS Hydraulic Control Unit, the valve may stick. If this condition remains undetected, it may lead to a loss of brake function on the affected wheel without notice, increasing the risk of a crash. | | |
