

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Import Vehicles

CAMPAIGN No.	GAI-2765	DATE	December, 2018
MANUFACTURER	Automobili Lamborghini SpA (Japanese Importer: Audi Japan KK)		
DESCRIPTION OF DEFECT	Under extreme conditions of usage of the vehicle the wheel centering bushes drive pegs (bolts centering and supporting the brake discs to the wheel's hub) may become loose. The wheel system however is secured by the central lock. Extreme conditions of driving, vibrations and severe usage stress factors over time may cause the drive pegs to come loose in the VIN range affected. With loose drive pegs and heavy condition of use for a long time, may lead to an overstress of the wheel locking system with risk of its fracture.
