

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic/Import Vehicles

| | | | |
|-----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|------------------|
| CAMPAIGN No. | 4409 | DATE | January 16, 2019 |
| MANUFACTURER | Mitsubishi Logisnext Co., Ltd | | |
| DESCRIPTION OF DEFECT | In the forklift electric circuit, since the selection of the EGR valve relay is inappropriate, so that the coil of the relay is lack of durability in the normal operating condition. As a result, the relay may be broken in short time and EGR keeps closing regardless the condition of the engine and in the worst case NOx may not be satisfied with Japanese exhaust emission standards. | | |
