VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	4550	DATE	August 21,2019			
MANUFACTURER	TOHO CAR CORPORATION					
DESCRIPTION OF DEFECT	There is a small clearance between the air hose fitting connected to the brake chamber, which is a component of the trailer braking system, and the air tank, and there is a risk that they will come in contact with each other when the step is run up. In the event of contact, the air hose connection port of the brake chamber may be damaged, the main braking capability may be insufficient, or the parking braking device may be activated, which may cause a problem in traveling.
