

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Import Vehicles

CAMPAIN No.	Gai -2906	DATE	2 September, 2019
MANUFACTURER	Dr. Ing. h.c. F. Porsche AG (Japanese Importer: Porsche Japan KK)		
DESCRIPTION OF DEFECT	<p>For vehicles configured without Porsche Communication Management (PCM), instead of the woofer a cover for the loudspeaker opening in the door sub-frame has to be installed. Due to an allocation error, it is possible that this cover was not installed in the affected vehicles.</p> <p>This leads to a different air pressure difference within the door. The pressure difference is used as an input variable for the crash sensors and thus for triggering restraint systems. Under certain circumstances, the deviating pressure difference can affect the triggering of the restraint systems.</p>
