

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic ~~Import Vehicles~~

CAMPAIGN No.	Gai-2872	DATE	2019/9/3
MANUFACTURE	Daimler AG (Japanese Importer : Mercedes-Benz Japan Co., Ltd.)		
DESCRIPTION OF DEFECT	On certain C-Class, E-Class and SLK vehicles (204, 207, 212, 172 platforms) with 4-cylinder gasoline engine (M271 EVO) the camshaft adjuster function could be impaired due to wear of mechanical components. First consequence of increased wear is a noticeable noise during engine start. Continued increasing wear may cause delayed engine starts which would illuminate the check engine warning lamp (MIL) and subsequently deactivate the heating of the catalytic converter. As a result, legal emission standards might not be met.
