

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic ~~Import Vehicles~~

CAMPAIGN No.	Gai-2953	DATE	2019/11/21
MANUFACTURE	Daimler AG (Japanese Importer : Mercedes-Benz Japan Co., Ltd.)		
DESCRIPTION OF DEFECT	On certain AMG GT vehicles (C190 platform), the bonding between the carbon-fiber driveshaft and the engine-/transmission flange could not meet the specification. The adhesive power of the glue could be impaired due to silicone residues on the bonding surfaces. In such a case, the connection between the carbon-fiber driveshaft and the flange might detach during vehicle operation. This could result in noises and/or an impairment of the transmission. In single cases, a loss of traction between engine and transmission. In consequence, the loss of motive power cannot be ruled out. This could increase the risk of a potential crash.		

TYPE	COMMERCIAL NAME	MODEL YEAR RECALLED	NUMBER OF VEHICLE
