| CAMPAIGN No. | Gai-2969 | DATE | 2019/12/26 |
| MANUFACTURE | Daimler AG (Japanese Importer : Mercedes-Benz Japan Co., Ltd.) | | |
| DESCRIPTION OF DEFECT | <p>On certain A-Class vehicles (177 platform) with panoramic roof the glass panel of the sliding roof might not have been bonded properly.</p> <p>Subsequently, the adhesion of this bonding might deteriorate gradually over time. This could result in protruding edges of the sliding roof and airstream noise.</p> <p>If this would not be noticed by the customer, the sliding roof might completely detach from the vehicle over time. Thus, the risk of a potential accident or injury for other road users would be increased.</p> | | |
