Sakura Shrimp

By Public Transport

Dining

The extraordinary depth of Shimizu's adjacent Suruga Bay, whose seabed reaches further down than any other bay in Japan, affords it impressive biodiversity and seafood options available nowhere else in the country or even the world. The small, crunchy sakura shrimp are a prime example of this. Caught twice a year, in spring and fall, these shrimp are a culinary adventurer's delight, as the diversity of cooking methods means that it is nearly impossible to get tired of this delicacy. Options that await you include *nama* (raw), available only during the fishing season; *kama-age* (boiled); *suboshi* (dried); and many more.
