

# Integrated urban mobility

**Stephen Perkins**

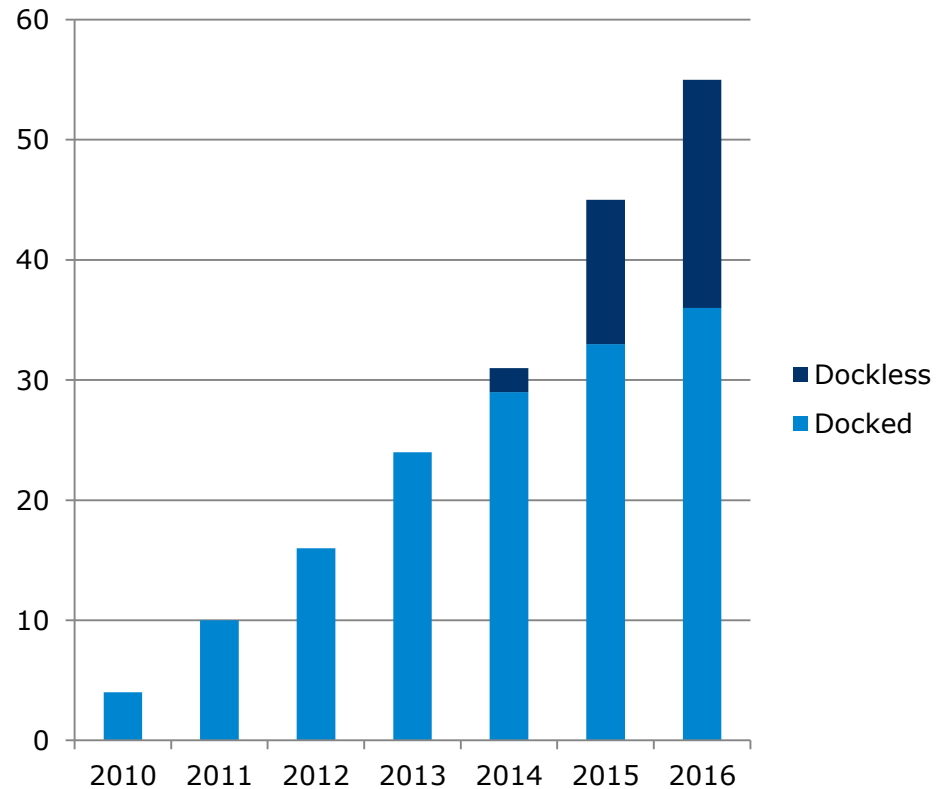

MLIT

Tokyo, April 2018

# Roundtable on Integrating Urban Public Transport Systems and Cycling

# Tokyo April 2017

## Bike share systems in USA

## Recommendations

- Shared bikes greatly extend public transport
- Space for parking needed, regulation enforced

# A problem not limited to bicycles

[www.alamy.com](http://www.alamy.com) - DB7NR2

## Infrastructure

- Safe, secure, direct, uncongested access to bus, BRT, light rail, metro, rail stations essential
- Nippori Toneri station area is exemplary
- Control commercial space

## Elevated light rail

- Successfully inserted into crowded system in Tokyo
- High quality creates good pedestrian environments
- Drawback is limited capacity
- Financing model interesting using road budget

## Tramways transform urban environments

- Not just a transport system
- Image and construction time politically attractive
- Alignments and access critical, Suzhou compromised

## Integrated ticketing

- As important as integrated infrastructure

# Integrated governance and planning

- Metropolitan transport authorities successful
- Interchanges between systems essential

CONNECTING EVERY PART OF YOUR LONDON

## Follow-up

- ITF Roundtable on the Regulation of App-based Ride Share and Bike Share Systems
    - Beijing, 1-2 November 2018
  - ITF Workshop on the Smart Use of Roads
    - Tokyo, 29-30 October 2018
  - ITF Cycling Safety Roundtable Report
  - ITF Corporate Partnership Board report on Rethinking the allocation of curb space
  - ITF Summit on Safety and Security, 23-25 May, Leipzig
- 

## **Roundtable on the Regulation of App-based Ride Share and Bike Share Systems**

- Economic framework of app-based ride services – market imperfections, reasons to intervene
- Shared mobility as a public transport mode
- What kind of bike-sharing model best for cities?
- Regulation of app-based ride services to control the negative impacts on congestion and environment

## Potential questions for discussion

- Potential market failures and options for intervention?
- What have governments been trying to regulate so far?
- What regulation to create “fair” conditions in the market?
- Can shared mobility complement traditional public transport?
- Case for governments to subsidize app-based ride services?
- Competition with taxi services.
- What makes for a successful public bike-sharing program?
- Competition between dockless and station bike-sharing.
- Transport demand management strategies to managing congestion from app-based ride services?
- Opportunities to promote clean vehicles?
- How can parking policies and curb space management strategies adapt to new entrants?

## List of potential participants

Name	Affiliation	Country
Tomas Svensson	Director-General of VTI	Sweden
Onesimo Flores	Former Lecturer at Harvard University Graduate School of Design, Founder of Jetty.mx, Conecta Cuatro	Mexico
Robert Cervero	Professor Emeritus of City and Regional Planning, UC Berkeley	USA
Susan Shaheen	Adjunct Professor, UC Berkeley	USA
Jinhua Zhao	Associate Professor of City and Transportation Planning, MIT	USA
Colin Murphy	Director of Research and Consulting, Shared-use mobility center	USA
John Nelson	Professor of Transport Studies, University of Aberdeen	UK
Limin Hee	Director of Research, Centre for Liveable Cities (CLC)	Singapore
Damien Geradin	Professor of Competition Law and Economics at Tilburg University; Visiting Professor at University College London	The Netherlands
Mikael Nyberg	Director General, Ministry of Transport and Communications	Finland
Richard Liu	Regional Director, East and Southeast Asia, ITDP	China
Michael Kodransky	Director, Global and US Initiatives, ITDP	USA
Roberto Cabrera III	Assistant Secretary, Land Transportation Office, Department of Transportation and Communications	Philippines
Florian Bohnert	Head of Global Partnerships, <b>Mobike</b>	China
Laurent Mercat	Founder and president of <b>Smoove</b>	France
Michael Masserman	Head of global policy & social impact, <b>Lyft</b>	USA
Weibin Zhao	Director of Government Affairs, <b>DiDi Chuxing</b>	China
Andrew Salzberg	Head of Transportation Policy and Research, <b>Uber</b>	USA
	Chariot	USA
	Transport for London (TfL)	UK
	Land Transport Authority (LTA)	Singapore
	Regional Transport Authority, Helsinki	Finland

## Workshop on the Smart Use of Roads

- Chair Professor Kasai
- Better utilisation of existing capacity
  - Big data to identify bottlenecks
  - Localised capacity measures to relieve congestion
  - Traffic demand measures – information, smart parking, integrated tolling, road pricing

# Review policies and worldwide experience

- UK
- Singapore
