Example 1

This is only an example for reference purpose.

Submission form for the Portfolio of Water Actions

Sectorial Topic (Note*)	- Water Resources Management and Benefit Sharing - Disaster Mitigation and Risk Management
Actor(s) [Nation (Ministry, Agency)/Organization]	Government of Japan (Council for Science and Technology Policy / Cabinet Office, MEXT, MAFF, METI, MLIT, MOE / CRL, NASDA, JMA / IFNet)
Partner(s)	- Metrological Organizations (WCRP / WMO, NOAA) - Satellite Organizations (CEOS / NASA, ESA, EC)
Title	Developing water management methods at global level through the research for change of global water cycle.
Objective	Provide scientific knowledge and technological basis and establish water resources management for sustainable development in order to avoid or minimize the effect of change of water supply/demand and water cycle on human society. Propose sustainable and preferable methods based on these knowledge and basis for water management. Share the information collected by the methods with the countries that are facing serious water problems.
Contents	<ol style="list-style-type: none"> 1) Global water cycle observation program Establish global water cycle observation program which enables mutual use of the observation data through the promotion of systematic observation such as satellite/ocean observation, land investigation and monitoring. 2) Development of water cycle change model Develop model to forecast the change of water cycle due to the changes of water resource demand/supply, climate changes, etc. 3) Evaluation of social effects Implement quantitative evaluation of the influence to food, water resources, ecosystem, human health, society, economy, etc. based on the environment change forecast due to the change of water cycle. 4) Integrated policy evaluation program Implement the evaluation on the applicability of the existing technology, forward new technology developments, and present countermeasure scenario in order to develop sustainable and desirable water management.
Means of Implementation	<ol style="list-style-type: none"> 1) Establishment of integrated scientific committee for multi-sector efforts 2) Coordination among international organizations 3) Observation/monitoring of land, sea, and air 4) Integration of database formats 5) Networking for data distribution and sharing 6) Capacity building and training program for data use
Target Year	1)&2) 2007, 3)&4) 2012
Target Area / place	- Global - Monsoon area (risk management) - Semi-Arid areas (water resources management) - Areas under development with human factors
Expected Outcome	- Create water resources management plans for XX countries. - Increase the population of people provided safe drinking water YY%. - Reduce death from flood by ZZ%.
Relevance to the Plan of Implementation of WSSD	Para 8, 25, 26, 27, 28, 29, 37, 105(e), 132 and 134

Note: ex. Safe Drinking Water, Sanitation, Biodiversity, Ecosystem Conservation, Water Resources Management, Disaster Prevention, etc.*

Example 2

This is only an example for reference purpose.

Submission form for the Portfolio of Water Actions

Sectorial Topic (Note*)	Safe Drinking Water and Sanitation
Actor(s) [Nation (Ministry, Agency)/Organization]	Country X
Partner(s)	Country Y
Title	“Safe Water and the Support on Community Activities” Project
Objective	Capacity-building for water management at the community level in sites that are selected from possible water supply areas in Country X, in order to contribute to a) sustain water supply, b) improve public hygiene, and c) increase education opportunity and leisure time for women/children by alleviating their labor quantity.
Contents	<ul style="list-style-type: none"> - Capacity-building assistance from Country Y for operation and maintenance at governmental level (Water Bureau). - Establish a Water Management Cooperative in village communities and transfer of operation skills with assistance from Country Y. - Provide opportunities to increase people’s incomes by alleviating water-related labor. - Technical Assistance from 2003 to 2006 (3 years).
Means of Implementation	<ul style="list-style-type: none"> - Water supply project through grant aid. - Dispatch of experts (from Country Y) for transfer water managing skills. - Assistance to various NGOs (including Country X and Country Y NGOs) in establishing a Water Management Cooperative.
Target Year	2006
Target Area / place	Places in where water management at community level is required.
Expected Outcome	Safe and sustainable water could be provided. As a result, a decrease in incidents of water-related diseases in village communities, an implement of the sanitation and hygiene environment, alleviation of the burden of drawing up water by women and children, an increase in the people’s cash incomes, and an increase in the opportunity of children to attend school, are expected.
Relevance to the Plan of Implementation of WSSD	Paragraph 8 and 25

Example 3

This is only an example for reference purpose.

Submission form for the Portfolio of Water Actions

Sectorial Topic (Note*)	Water Pollution Prevention and Ecosystem Conservation
Actor(s) [Nation (Ministry, Agency)/Organization]	Country A
Partner(s)	
Title	Improving the national awareness for environmental water quality information
Objective	Improve water quality in urban areas where rapid urbanization is in progress suffering from deterioration of water quality, by raising public awareness on the water environment and by empowering the citizens to build capacity in dealing with the problems.
Contents	<ol style="list-style-type: none"> 1) Establish the system for monitoring water quality in order to know the situation of the water quality in the city area correctly. 2) Foster the awareness towards water quality and increase the understanding of the citizens on conservation and improvement of water quality. 3) Enrich water environment education to foster and sustain the awareness towards conservation and improvement of water quality.
Means of Implementation	<ol style="list-style-type: none"> 1) Government <ul style="list-style-type: none"> - Establishment of organization/team for statistical information - Development of guidance for noticing water quality in local government - Public awareness activity to gathering of water quality monitoring - Financial assistance for water environmental education in school by NGOs 2) Citizen or NGOs <ul style="list-style-type: none"> - Establishment of water environmental education program in school
Target Year	2005
Target Area / place	Metropolis (the areas suffering from water pollution)
Expected Outcome	Halve the amount of living waste burdens flowing into the river basin
Relevance to the Plan of Implementation of WSSD	Paragraph 24, 25 and 27
Other Information	Monitoring equipment and know-how sharing help the action be promoted.
