

# List of “Portfolio of Water Actions”

As of 10 March 2003

## Armenia

- Development of National Water Policy
- Development of National Water Program
- Establishment of watershed management bodies in Debet River basin

## Austria

- Administrative Aspects of Austrian Water Management in changing times

## Cambodia

- Rehabilitation and Construction of Existing and New Irrigation /Drainage Systems and Flood Mitigation, with Community Participation

## Central African Republic

- Drinking Water Supply and Sanitation in the Central African Republic

## China

- Resolving drinking water problem for rural population
- Restoring the ecosystem
- Protecting the water resources
- Flood management
- Water-saving Action
- South-to-North Water Transfer
- Action for Accelerating Construction of Hydropower Stations in Rural Areas
- Implementing integrated water resources management
- Utilizing non-conventional water resources
- IT in water management

## Czech Republic

- Groundwater Resources Investigation in Drought Stricken Areas of Ethiopia
- Prevention Control of the Ibar River against Petroleum Hydrocarbons Contamination
- Sustainable development and management of water resources on combat desertification Dornogobi area in the south-eastern part of Mongolia
- Drinking water supply in the area Rovni City /Regional Water Resources System Rovni
- Building of good-quality drinking water sources in south-western parts of Ethiopia
- Hydrogeology of cross-border Cretaceous aquifers on the Czech-German-Polish border
- Dialogue on Water, Food and Environment in Central and Eastern European Countries
- "Czech Water Charter"

## Democratic Republic of Congo

- Enhancement of capacity of control patrols and surveillance of water resources in the Congo River basin

## Ethiopia

- Providing safe drinking water and sanitation services to broader segment of the Ethiopian Society
- Irrigation infrastructures development for food security and national economic growth
- Co-operation on the Nile Waters Management and Development
- *General Water Resources Development Programme (2002-2016)*- Water quality management monitoring and watershed management programmes

## France

- Water and Sustainable Development (African continent)
- Institutional Reform in the Water Sector (Lebanon)

- Institutional Reform in the Water Sector (Ethiopia)
- Institutional Reform in the Water Sector (Tchad)
- Water Supply and Sanitation Sector Reform (Mauritania)
- Reinforcement of Human Capacities in the Water Sector (Kenya)
- Mastering Water supply Locally (Niger)
- Sustainable Management of Water Resources (Cap-Verde)
- Virtual Center for Agriculture Water
- Institutional Cooperation to increase Sustainability and Profitability of Irrigation
- Improvement of Performances on Irrigation Schemes in Africa
- Strategy for Better Management of Agricultural Water (Middle East)
- Drinking Water Supply of the Cities of Nioro and Diema (Mali)
- Public sanitation in Ouagadougou (Burkina Faso)
- Drinking Water Service Management of the City of Tripoli (Lebanon)
- National Water Investment Program (Tunisia)
- Rehabilitation of Prey Nup Polders (Cambodia)
- Drinking Water Supply of shantytowns in Port-au-Prince (Haiti)
- Water Economy in Irrigated Systems in North Africa (SIRMA)
- ECHEL-Eau : evaluation of water resources from field to large river basin, for application in the Limpopo, Mekong and Niger river basins
- Water resources management (Sahelian African zones)
- Observation of the water-table in the east-african rift. Sustainable management
- Pilot projects for a Private Sector Participation in irrigation (Morocco)
- West Alexandria wastewater program (Egypt)
- Supply of Equipment and Transfer of Technology for Groundwater Management and Exploration in Coastal Areas (India)
- Research action for solid and liquid waste management
- Institutional reform in the water sector

### **Gabonese Republic**

- Water supply systems for the living populations in urban and rural area

### **Germany**

- Water Supply and basic Sanitation in Bustillo, Bolivia
- Water Supply Eastern Province II, Zambia
- World-wide Hydrogeological Mapping and Assessment Programme (WHYMAP)
- Reform of the Urban Water and Sanitation Sector
- Commercialization of Water Supply and Sewerage Utilities in the North-Western and Southern Provinces, Zambia
- Drinking water and sewerage program in small and middle-sized towns
- PROAGUA/GTZ Program - Water and Sanitation Program for Selected Cities in Peru
- Efficient Management of Waste Water Treatment

### **Greece**

- Euro – Mediterranean Water and Poverty Facility (*WPF*)
- Mediterranean Education Initiative for Environment & Sustainability, with an emphasis on water and waste (*MEDIES*)
- Sustainable water management in the Balkan and Southeast Mediterranean area
- Implementation of the European Union’s Water Framework Directive (2000/60/EC) in Greece

### **Hungary**

- “Elaboration of a harmonised development program of accidental pollution prevention and response plan, testing of three EU Guidance Documents in connection with the EU Water Framework Directive (WFD) implementation for the whole Szamos/Somes watershed”
- Drinking Water Source Protection Program
- Raba River’s 10 years of Integrated River Management Program
- Programme of Further Development of Flood Protection in the Tisza River Basin (New „Vásárhelyi Plan”)

### **Iceland**

- Master Plan for Utilization of Renewable Energy Resources in Iceland. Hydro Power and Geothermal Energy
- Committee on the Restoration of Icelandic wetlands

### **Indonesia**

- Water Supply and Sanitation (Sector) Project
- Urban Water Supply and Sanitation Project
- Energy Subsidy for Water Supply Program
- National Food Security Program
- Improved Irrigation Management and Agricultural Productivity
- Study on Master Plan of Counter Measures for Critical Rivers and Lakes in Indonesia
- Conservation and Management of Lakes Programme
- Flood Management in Selected River Basins in Java
- Development of Flood Control Measures In Strategic Area
- Capacity Building, Sharing Information and Creating Networks on Disaster Management (Change of Global-Regional Water Cycle)
- Improved Water Resources Sector Performance
- Dialogue on Food, Water and Environment

### **Iran**

- Consumption management and drinking water losses reduction
- Assessment of the state of the art of Urban Water Management in Middle East and CIS Countries
- Assessment of Actual Flood Control Management in Iran and Proposition of Proper Strategies
- Survey of Public Participation Attraction on Promotion of Water Resources Quality
- Formulation of the Drought Risk Management Program
- National Water decade (2004-2014) two five years plan

### **Ireland**

- Ireland - Portfolio of Water Actions for the World Water Forum 2003

### **Italy**

- Land planning in the periurban area of Niamey (Niger)
- Disi – Mudawarra to Amman Water conveyance System
- CIRF assistance to Italian subjects for ensuring environmental sustainability in cooperation initiatives
- Ríos Hermanos (River Brotherhood)
- WATER LEAK RESEARCH
- Triennial Master for utility managers and public regulator body officers
- INTERNATIONAL OBSERVATORY ON TRAINING AND CO-OPERATION IN WATER RESOURCES MANAGEMENT
- GPIC/WS Global Policy and International Cooperation in the Water Sector
- Master in Water resources Management and hydraulic and civil engineering
- Tagubar, Institutional Capacity for the Environmental Rehabilitation and sustainable development of Guanabara Bay, Brazil
- TWINNING: Monitoring of drinking water quality
- TAGUBAR, INSTITUTIONAL CAPACITY FOR ENVIRONMENTAL REHABILITATION AND SUSTAINABLE DEVELOPMENT OF GUANABARA BAY, BRAZIL
- Post graduate specialization course on management of water resources and services”
- Systemic Integration of Networks for Sustainable Freshwater Management (SINFREM) in West/Central Asia and North Africa (WESCAN) national and regional levels
- Rain water drainage in the barrios of Cazenga e Cariango (Luanda, Angola)
- Egyptian – Italian Environmental Cooperation Program (EIECP) – Phase II
- Development of the water rural system in the Boane district
- Small scale irrigation scheme development
- Integrated Development Programme in Agriculture

- Republic of Macedonia - Environmental Protection of the Radika River Valley
- Realization of a Research and Agricultural Experimentation Center
- Jbeil Caza (Province) Water and Waster Water Project
- WEI WEI Integrated Development Project
- Institutional strengthening in the water field
- Strengthening of main information center (MIC) of the Ministry of Water Resources & Irrigation in its capacity of National Focal Point (NFP) for the Euro-Mediterranean Water Information System (EMWIS)
- Improve food security and Water Resource Management

## **Japan**

- Planning on Water Resources Development and Management and Capacity Building of Implementing Agencies
- Water Resource Management and Conservation through Afforestation, Anti-desertification, and watershed management
- UN Decade of Education for Sustainable Development
- Surveys Related to the Feasibility of Applying Energy-saving Sludge Reduction Technologies in Southeast Asia
- Monitoring water quality by advanced ion chromatography
- Watershed/Urban Regeneration in Accord with Nature
- Integrated River Basin Management
- Restoration by Eco-Compatible and Adaptive Management in River Basin
- Twinning Agreement in Integrated Water Resources Management
- NETWORK OF ASIAN RIVER BASIN ORGANIZATIONS
- International Conference on Inland Waterway Transport
- Research on Development Status and Assistance Strategy in International River Basin (The Mekong River)
- Socio-Economic research on long-term trends seen in the waterside environments of the world, through studies of their changes in scenery
- Promotion of Effective Use and Capacity Building of Management for Existing Infrastructure and strengthening of Operation & Maintenance capacity
- Advanced Prediction System and Counter Measures of Regional- and Meso-scale Water Cycle
- Research Cooperation Project on Seawater Desalination and Public Water Demand in Oman
- Cooperative Research on Hybrid Seawater Desalination for Middle East Countries
- Cooperative Research on Technology to Increase the Utilization of Recycled Industrial Water for Environmental Applications
- Development of Energy-Saving Waste Water Treatment Technology
- Technology development on the Multiple-purpose use system of Deep Ocean Water
- Initiative for Research Activities on Global Water Cycle Variation
- The sustainable ARGO Project
- Global Precipitation Measurement (GPM)
- The Integrated Global Observing Strategy (IGOS) Partnership
- Monitoring and modeling of balance, circulation, and utilization of groundwater in the Yellow River basin
- Global Mapping
- Strengthening Water Supply System and Operation / Maintenance through Groundwater Development in Africa
- Strengthening the Development and Operation / Maintenance on Water Supply System and Sewerage System in Asia
- Stable Water Supply and Water Governance in Middle East and Near East
- Water supply and/or sewerage treatment project in regional cities in Latin American Region
- Water supply and/or sewerage treatment project mainly in Pacific Island Region
- Strengthening Control of Water-related Diseases, including Arsenic Poisoning and the Guinea-worm Disease in Asia and Africa
- US-Japan Water Partnership : the "Clean Water for People" initiative
- Partnership With NGOs
- Integrated Study on Restructuring Water-use System for Sound Water Cycle
- Studies for Plan to Maintain the Global Environment Protected the Widely Arsenic-Affected Groundwater

- Research and Development of environmental sanitation technologies suitable for developing countries
- Technology transfer of the on-site treatment system of domestic waste water
- To share knowledge, experience and information on operation and maintenance of water supply and sanitation
- Reinforcement of Government Policy and Implementing Capacity to Improve Water Productivity in Developing Countries
- Increase of Agricultural Productivity by Improving Irrigation System and Technique
- Construction of irrigation facilities and enforcement of local community organizations through Participatory Development of Water Resources
- Recycle and Reuse of Water Resources
- Development and Dissemination of NERICA (New Rice for Africa)
- Sustainable rural modernization based on neighborhood communities
- International cooperation for improving the efficiency of agricultural water use
- Food for Work
- Sustainable Agriculture in the Arid Areas
- Increasing Economic Options of Rain-fed Agriculture in Indochina through the Efficient Use of Water Resources
- Combining advanced weather modeling and farmer knowledge to reduce risk in in West African cereal-based cropping systems
- Water Resource Development Strategy-Building Survey (Asia)
- Effect evaluation of global water circulation changes on food production with consideration of potential countermeasures
- Modeling and economic evaluation of the multi-functionality of paddy fields
- Development of water use estimation models related to agriculture and irrigation for the Asia Monsoon region
- Promotion of agricultural water-related projects, taking into account ecosystem conservation and water quality improvement as well as enhancing multi-functionality
- Promotion of Rural Community Sewerage Improvement Projects
- Legal Reforms to Achieve Harmony with the Environment on Agricultural Infrastructure and Rural Development Projects
- Development of Eco-friendly Management Technology of Water and Agro-Forested-Aqua-Ecosystem (AFA-Ecosystem) in Watershed and Estuary (W&E) areas
- Promotion of Participatory Irrigation Management (PIM)
- Water Use and Management System of the Mekong River
- Creative actions for Land Improvement Districts (LIDs) (a new action taken by the MIDORI Network initiatives)
- Irrigation and drainage project to re-allocate agricultural water use to meet urban water demands
- Enhancement of Water Quality Conservation, Industrial Waste Water Control and Domestic Waste Water Management
- Package cooperation on institutional measures and cleaner production technology to prevent industrial pollution in Vietnam, the Philippines, Indonesia, Thailand, India, Jordan
- The establishment of the total system regarding to the clarification of wastewater due to food processing
- Research and Development of monitoring methods of toxic substances and pathogenic microorganisms
- Water Environmental Partnership in Asia (WEPA)
- Study on development of assessment methods for water pollution and monitoring methods for toxic cyanobacteria in water resource regions in Asia
- Water Quality Improvement to conserve environment and aqua-ecology
- Development and establishment of a network for exchanging information on water and forests
- Appropriate Forest Management According to Forest Planning System
- Sustainable watershed management in developing countries through international cooperation to promote sustainable forest management
- Development and implementation of criteria and indicators for the sustainable forest management (the Montreal Process)
- The research regarding to the phenomenal analysis of the organic, the nutrient salts, and the biocoenosis in lakes and marshes, and the investigation of the achievements by the recovery efforts
- Development and dissemination of the water purification measures utilizing the self-purification function

of rivers

- Asia-Pacific Environmental Innovation Strategy Project (APEIS)
- Cooperative program on conservation of waterbirds and their habitats in Asia-Pacific region
- Evaluation of Vulnerability of Natural Ecosystems to Global Warming
- Disaster Preparedness due to the Development and Rehabilitation of the Flood Forecasting and Warning System
- Comprehensive Development Plan, Equipment and Technology for Flood Control
- Flood Control Works utilizing the Local and Natural Materials
- Flood Control and Sanitation Improvement in the Urban Areas
- Highly Accurate Rainfall Estimation by Multi-parameter Radar and Information Providing System for Storm and Flood
- Flood mitigation distributing information technology
- Improvement of the system with information technology to monitor the occurrence of sediment-related disasters and to distribute them
- Comprehensive approach to mitigation and prevention of sediment-related disasters
- National Land with Water Information Standardized whole river basin dataset & consolidated applications for Integrated Watershed Management
- Development of IT technologies to mitigate flood damages
- International Flood Network (IFNet)
- Soda Mattress System as a mean of Riverbank Erosion Protection
- International Sabo Information Network

#### **Kazakhstan**

- Ecological security of Kazakhstan sector of the Caspian sea
- Drinking water provision for population

#### **Myanmar**

- Irrigation Technology Center Project Phase (2), (Irrigation Water Management Project)
- Development (or) Establishment of National Water Vision to action for Myanmar

#### **The Netherlands**

- Partners for Water(Dutch Programme for the foreign water sector)
- IGRAC - International Groundwater Resources Assessment Center
- Integrated Flood Management in Deltas and Low-land River Regions
- Widening of the river Rhine in the Netherlands
- Netherlands Initiatives in Public Private Partnerships-Partnership Public Private Collaboration in the Water Sector
- Water for Food and Ecosystems
- Twinning of International River Commissions / Basin Organizations
- Capacity Building for Sustainable Integrated Water Resources Management – from Women's Empowerment towards Gender Mainstreaming
- Women for Water partnership: from vulnerable group to partner

#### **Norway**

- Total Norwegian assistance for DAC-code 140 Water Supply and Sanitation in 1999, 2000, 2001

#### **Papua New Guinea**

- Laloki Water Resources Management Project
- Ensure the nations natural environment and water resources are managed and used in a sustainable, efficient and equitable manner
- Assessment of the Nations Water Resources
- Development of Water for District Centers
- Integrated Coastal Watershed Management

#### **Portugal**

- Elaboration of dam safety plans and specific monitoring requirements (SEGBAR)

- Elaboration of the Project of Bué Maria Dam
- Monapo River Basin Plan
- Hydrometeorological network
- Agreements on international rivers
- Development of the Water supply systems in four cities
- Water supply and drainage systems of Lumbo / Mozambique island
- Support the Centre of Strategic Studies on Water – CEDESA
- Capacity building and technology transfer
- Capacity building and technology transfer
- Hydrometeorological network
- Capacity building and technology transfer

### **Republic of Korea**

- Water Demand Management
- Establishing Watershed Management System
- Establishment of Multi-regional Water Supply System
- Building the Basinwide Integrated Flood Control Plans
- The third ten years plan of rural water supply

### **Sri Lanka**

- Collaborative actions to implement sustainable preventive & mitigatory measures for river pollutions and building up a national river basin wise data base on water quality and pollution threat information
- Developing National Level IWRM methodology to implement at local level taken into consideration the Global Research information and regional sectoral requirements
- Safe drinking water and the support on national economic development and community activities
- Granary Area Programme (GAP)
- Special programmes to develop minor irrigation systems, improve water retention capacity in the soil and improve bio-diversity through active community participation
- Water Resources Management Project: National Water Resources Policy and Institutional Arrangements
- “Pavithra Ganga”- prevention of water pollution in the Mahaweli river, Sri Lanka
- “Pavithra Ganga”- prevention of water pollution and environmental management of rivers in Sri Lanka
- Development of a Sri Lanka National Water Resources Development Report (under Water Resources Assessment Programme)
- Expansion of Micro-Irrigation methods

### **Sudan**

- Provision of safe water for rural and urban areas in Sudan
- Water Pollution Prevention and Improving Environmental Water Quality
- Water Use For Agriculture
- Flood and Drought preparedness, Early Warning and Remediation
- Water Shed Management of The Nile Tributaries
- Biodiversity, Habitat, Water dependent Ecosystem and Wetlands Conservation
- Participation of Sudan with the Nile basin countries in the Shared Vision and Subsidiary Action Programme
- Development of hydropower at both the National and Regional levels
- Sustainable Development and Environmental Protection of the Red Sea and Coastal Areas

### **Sweden**

- Method development and general promotion of Ecological Sanitation
- Promotion of sustainable development in the Lake Victoria Basin
- Swedish Water House (SWH)
- The Sustainable City, a Swedish-Chinese partnership
- A new Swedish water administration
- Negotiations for an agreement on cooperation concerning the Finnish-Swedish border rivers

### **Switzerland**

- Guidelines for Private Sector Participation in water management by means of a multistakeholder process
- Regional Water Sector Strategy 2002-2006, included as a sub-component in the Eastern Europe/Caucasus/Central Asia Component of the EUWI

### **Tanzania**

- Groundwater Resources Development and Management
- Strengthening water laboratories in Tanzania
- To raise the rural water supply coverage from 50% to 100% by the year 2025
- Water Quality Monitoring and Ecosystem Management - Lake Victoria Environmental Management
- Hydrological Map and Atlas of Tanzania
- Sustained Water Supplies for Rural Development and Food Security
- Establish Integrated Water Resources Management Program
- Establish and strengthen Basin Water Offices in Tanzania
- Strengthening Urban Water Supply and Sewerage Authorities (UWSAs) in Tanzania

### **Thailand**

- Assessment of Water Resources in the Chao Phraya River Basin
- The Modernization of Water Management System
- King's Theory on Land and Water Management for Sufficient Economy
- Establishment of Operation Center for Water Crisis Prevention
- Awareness Raising in Water Issues

### **Tuvalu**

- Revive and Adopt the Tuvalu Water and Sanitation Plan

### **United Kingdom**

- Safe drinking water and sanitation

### **United States of America**

- Water for the Poor
- White Water to Blue Water
- Safe Water System
- Transboundary Water Resources Management
- Development Credit Authority Local Currency Financing
- Community Water and Sanitation Facility (CWSF)
- Collaborative Research to Enhance Management of the Yellow River Basin
- Clean Water State Revolving Fund (CWSRF) Program
- U.S. Public Water Supplies: Compliance with Drinking Water Safety Standards under the Safe Drinking Water Act (SDWA)
- Western Water Initiative: Meeting water needs given growing demand
- Drought Planning and Emergency Aid
- USDA Natural Resources and Environment National Program
- Internet-based Water and Sanitation Deficiency Inventory System (WSDS)
- Nationwide Water and Sanitation Facilities Construction Program to Serve Indigenous Peoples
- Flexible Cooperative Agreements for Project Development Partnerships
- Supporting Local Government Capacity Building and Ownership of Constructed Systems

### **Zambia**

- Enhancing the involvement of users in regulating service providers
- Provision of water supply in Peri-urban areas (low income communities) in eight towns
- Institutional capacity strengthening for improved service delivery - in Luapula Province
- Strengthening the prevention and control of surface and ground - water pollution in Zambia
- Improving the Data Collection Network and Monitoring in Zambia
- Dialogue on water initiative in Zambia
- Increasing the sources of portable water through quality analysis of springs in Zambia

- Constructions of small dam 3 + weirs in local forest reserve No. 27
- Riverine/River Banks Conservation
- (Water for food and rural development)
- Institutional capacity building for civil society in the water sector
- (Safe drinking water and sanitation)
- Institutional capacity building for small scale private sector in the provision of water supply and sanitation service. Provision through production, dissemination and operationalization of best practice guidelines.
- Capacity building for WASHE programme in both rural and peri-urban area

#### **Macau SAR**

- Clean Water Campaign

#### **ADB**

- The Gender in Water Partnership
- Water for Asian Cities Program Memorandum of Understanding
- Pacific Type II Initiative on Water, Sanitation and Hygiene
- Network of Asian River Basin Organization
- Promoting Effective Water Management Policies and Practices – Technical Assistance
- Rural Water and Poverty Initiative

#### **APO**

- Green Productivity Demonstration Program (GPDP), Green Productivity Integrated Community Development (GP-ICD)

#### **ESCAP**

- Providing Basic Services to the Poor through Public-Private Partnerships: UNESCAP Follow-up to the World Summit on Sustainable Development (WSSD)
- Capacity building on strategic planning and management of water resources in Asia and the Pacific
- Regional cooperation in water-related disaster management in Asia and the Pacific
- Strengthening public-private partnership for improving the provision of water supply and sanitation services to the poor
- Promotion of awareness of water conservation; water use efficiency planning
- Rational use of water and energy resources in Central Asia
- Sustaining Livelihoods, Food Security, Public Health and Environmental Integrity in Irrigated Rice-based Systems in South-east Asia

#### **IFRC**

- Tajikistan Drought Recovery Programme
- Water and Sanitation Rehabilitation and Hygiene Promotion in DPR Korea
- Disaster Preparedness (DP) and Climate Change in the 5 pilots
- Disaster Preparedness and Climate Change in Nicaragua
- Disaster Preparedness and Climate Change in Vietnam
- Drinking Water and Sanitation Programme
- Tajikistan Sanitation and Hygiene Promotion Through Schools
- South African Red Cross Society Water and Sanitation project in the rural communities of KwaZulu Natal, South Africa.

#### **International Joint Commission (IJC)**

- Protection of the Waters of the Great Lakes Basin
- Great Lakes Water Quality Agreement
- Reducing flood damages in the Red River basin through development of a basin-wide comprehensive plan for flood mitigation

#### **IUCN**

- Nile Basin Civil Society Discourse

- Pro-poor financing for water-based ecosystem conservation in South and Southeast Asia
- Vietnam National Wetlands Programme
- Water Management and Nature Conservation Programme in Pakistan
- Conservation and Sustainable Use of Wetlands in Nepal
- Regional interpretation of the findings of the World commission on Dams in the lower Mekong river basin
- Mekong Wetlands Biodiversity Conservation and Sustainable Use Programme
- Water and Nature Initiative in the Himal region
- Promoting sustainable livelihoods through wetland conservation and enterprises development
- Water Demand Management in Southern Africa
- SADC Regional Wetlands Conservation Project Phase II
- Awareness creation for IWRM in the SADC Region
- Okavango Management Plan
- Integrated management of the watershed areas associated with the Tacana Volcano (Mexico-Guatemala)
- Integrated Watershed Management in the El Imposible-Barra de Santiago, El Salvador Complex
- Water Resources eAtlas : Integrated Information for Improved Decision-Making
- Enhancement of political support for sustainable water management
- Legal Foundations for Integrated Water Resources Management (IWRM).Goal: Build capacity for IWRM through addressing legal, institutional and governance issues
- Assessing the Status of Freshwater Biodiversity
- Environmental Flow Toolkit Development and Application
- Promoting enhanced investment in sustainable ecosystem management within private and public sector water development policy
- Integrating wetland economic values into river basin management
- Implementation of the Strategic Action Programme for the Sustainable Management of Lake Tanganyika
- Integrated River Basin Management in the Pangani Basin, (Tanzania and Kenya)
- Dealing with Uncertainty: Planning And Management Of Water Resources under Climate Change
- Improving Water Governance in the Volta River Basin
- Improving Water And Land Management In The Komadugu Yobe Basin -- Phase I

### **OECD**

- OECD participation in the "Euro-Mediterranean Water and Poverty Facility (EuroMed WPF): A Tripartite Programme of Action"
- OECD participation in the "EU Water Initiative: Water for Life"
- OECD work on improving water resources management

### **UNCHS (HABITAT)**

- Water & Sanitation Trust Fund
- Water for Asian Cities
- Water for African Cities
- Water-related Environmental Education in Cities
- The Status of Water and Sanitation in the World's Cities
- Water & Sanitation Trust Fund
- Water for Asian Cities
- Water for African Cities
- Water-related Environmental Education in Cities

### **UNDP**

- International Network for Capacity Building in Integrated Water Resources Management – Cap-Net
- Dialogue on Effective Water Governance
- UNDP Community Water Initiative

### **UNEP**

- Dams and Development Project (DDP)

### **UNESCO**

- Groundwater in Emergency Situations - GWES

## **World Bank**

- The Water and Sanitation Program
- Reforming Irrigation Institutions
- Bank-Netherlands Water Partnership (BNWP)
- Bank-Netherlands Water Partnership (BNWPP)
- Water Resources Management in the World Bank
- Water Supply and Sanitation in the World Bank
- Water as part of the World Bank Environment Strategy – Making Sustainable Commitments
- Participatory Irrigation Management
- Main Directions of the Action Plan for Improving the Ecological and Socio-economic Situation in the Aral Sea Basin for the period 2003-2010
- Strategic Partnership on the Danube/Black Sea Basin
- Nile Basin Initiative (NBI)
- Building Partnerships for Development in Water and Sanitation

## **WHO**

- Disease burden from water, sanitation and hygiene related diseases / Cost-effectiveness analysis of selected interventions to improve access to safe water supply and adequate sanitation facilities.
- Development of health-based norms and guidelines
- Global Water Supply and Sanitation Assessment
- International Network to Promote Safe Household Water Treatment and Storage
- Information systems
- Guidance document on water, sanitation and health
- Healthy Environment for Children Alliance
- Health impact assessment of water resources development
- Sanitation Connection, Sanitation for Health and the Environment, e-Conference

## **WMO**

- WMO/GWP Associated Programme on Flood Management (APFM)

## **WWAP**

- Case Studies for the Second World Water Development Report
- African Water Development Report
- National Water Development Reports
- The World Water Portal – A Water-Web Platform for International Cooperation
- GOUTTE of WATER: Global Observatory of Units for Teaching, Training and Ethics of WATER
- Water Co-operation Facility: The international support centre for managing water conflicts and building consensus
- Exchange of Hydrologic Data Concerning Transboundary Water Resources
- Foro Latinoamericano: “La concertación: Instrumento para la gestión sostenible del agua dulce en el Siglo XXI”

## **WWC**

- The benefits brought by sound water management
- Global Linking of Water Monitoring Systems
- Virtual Water Trade – Conscious Choices
- The International Water Co-operation Facility: for building consensus and managing water conflicts
