

# Japan Construction International Award

Global Showcase of Quality Infrastructure by Japanese Technology

## Japan's "quality infrastructure" to expand overseas.

The Ministry of Land, Infrastructure, Transport and Tourism of Japan established “Japan Construction International Award (honored by the Minister of Land, Infrastructure, Transport and Tourism of Japan)” in 2017 to commend overseas construction projects as global showcase of Japanese “quality infrastructure” initiatives which demonstrate Japan’s strengths. It also commends small- and medium-sized construction companies which play leading roles in overseas markets. Through this award, we aim to promote global understanding of the Japanese companies’ competitiveness and expect more projects to be carried out by Japanese companies.
