

Notice of Competition

We invite you to submit a project proposal as follows:

1. Overview of project

- (1) Project name: PR Project for Visit Japan Campaign in Taiwan in FY2010
- (2) Content of project: PR project in FY2010 using TV, the Web, newspapers, magazines, advertisement in public transports and other mass media to the fullest extent for increasing tourists visiting Japan from Taiwan
- (3) Deadline of enforcement: March 28, 2011

2. Qualification for participation in the competition

- (1) Not come under the provisions of Article 70 and Article 71 of the Cabinet Order concerning the Budget, Audit and Accounting (Royal Edict No.165, 1947)
- (2) Have a qualification for "service," in terms of the qualification for participating in tenders by the Ministry of Land, Infrastructure, Transport and Tourism (single qualification for every ministry and agency) in the fiscal years 2011/2012/2013.
- (3) Not during the suspension of tender by Director of the Budget and Accounts Division Minister's Secretariat, Ministry of Land, Infrastructure, Transport and Tourism

3. Procedures

- (1) Division in charge: Mr.Kuge, Attracting and Hosting of MICE, International Tourism Promotion Div, Japan Tourism Agency,
Postal code: 100-8918
Address: 2-1-3 Kasumigaseki, Chiyoda-ku, Tokyo, Japan
TEL: 03-5253-8923
FAX: 03-5253-1563
- (2) Period, place and method of issue of instructions
From 30.JUNE 2010 to 5 p.m. 29.JULY.2010, same as (1),
- (3) Time limit, place and method of submitting the project proposal: Until 12 p.m. 30.JULY.2010, same as (1), by hand or by mail (Not later than the time limit even in a case of mail and with delivery certificate)
- (4) Explanatory meeting: No
- (5) Hearing concerning the project proposal

Hearing presentation on the content of submitted project proposal may be held as necessary

4. Others

- (1) The language used in procedures shall be Japanese and the currency is limited to Japanese yen.
- (2) The office of inquiry for obtaining reference information is same as 3(1).
- (3) The costs required for creation and submission of a project proposal is borne by the one who submits his project proposal.
- (4) A project proposal submitted to the Project Competition Implementation Committee shall not be subject to secondary use without the permission of the party that submitted the proposal.
- (5) If any false information is entered in the proposal, the said proposal becomes invalid and the applicant who entered the information may be suspended for tender.
- (6) If a request for disclosure is made for the adopted content of proposal based on the information disclosure laws of an administrative body such as the government, the content should be documents that are planned to be "disclosed" in advance.
- (7) Although the person adopted is optimal as a result of the project competition, no contractual relationship with the government occurs until the contractual procedures based on the accounting laws are completed.
- (8) As a result of the competition, the following matters shall be published as soon as possible after the notification of adoption is issued and shall be published at least until the day on which the contract is concluded.
 - 1) Name, address, name of representative and the date of decision of the participant in the project competition who submitted the adopted project proposal.
 - 2) Evaluation scores and total scores by company and by item of evaluation
- (9) Other details are included in the instruction.

30.JUNE. 2010

Yasuhito Kawarabayashi

Director of the International Tourism Promotion Division, Japan Tourism Agency

PR Project for Promotion of Visit Japan Campaign in Taiwan in FY2010

Instructions for competition

30.JUNE.2010

International Tourism Promotion Division
Japan Tourism Agency
Ministry of Land, Infrastructure, Transport and Tourism

We solicit a project proposal of PR project for the promotion of Visit Japan campaign in Taiwan in FY2010 as follows. Please apply for it taking into account the following matters if you would like to.

Content

1. Name of subject of project

PR project for the promotion of visit Japan campaign in Taiwan in FY2010

2. Overview of project

(1) Purpose of project

Increase in the number of foreign tourists visiting Japan contributes to enhancement of international mutual understanding. In addition, it is becoming important to further promote tourism in Japan that is facing the rapid decrease in population, development of the aging society with fewer children and the recession of local economy, because tourism is expected to achieve a significant economic effect such as activation of the local economy through domestic consumption by tourists and increase in the opportunities for employment.

As a result of the Visit Japan Campaign started in 2003, the number of tourists visiting Japan has increased 3.14 million (by 60%) for six years until 2008. From a viewpoint of the domestic consumption by those tourists, a consumption induction effect of 19.5 yen to the project cost 1 yen was generated (Administrative Evaluation Office, Ministry of Internal Affairs and Communications). Although the effect has been achieved, there is still a much room for growth because the international tourism market is expected to expand in the future and Japan only stays at the 28th position in terms of international comparison of the number of foreign tourists.

In order to achieve the goal concerning the number of foreign tourists visiting Japan "15 million tourists in 2013, 20 million 2016, 25 million in 2019 and 30 million in the future" under a severe external environment such as recession of the world economy and the epidemic of influenza H1N1, it is an urgent matter to comprehensively make various efforts at a larger scale and better quality than other countries including neighboring countries competing with the attraction of international tourists.

This project aims at the increase in demand and promotion of further increase in the Taiwan market by implementing PR activities using TV, the Web, newspapers, magazines, transportation advertisement and other media in the most effective way in order to increase the number of tourists visiting Japan from Taiwan, the most

important market.

(2) Content of project

In order to increase the number of the Taiwan people visiting Japan, effective advertisement for increasing in the tourists visiting Japan will be implemented using TV, the Web, newspapers, magazines, transportation advertisement and other media in the most effective way based on Exhibit 1.

Please specify the following (I~IV) in the project proposal in making a suggestion.

- I. Specify the basic concept, design, expression of advertisement and media used
- II. Specify the process of project and a rough schedule
- III. Specify the implementation structure of project (specify details including the prospected number by project in charge)
- IV. Set a quantitative target value and a qualitative target and specify its idea in order to implement ex-ante and ex-post assessments. In addition, specify expected effects of each content of implementation and a method of measuring results in order to verify individual effect of advertisement used in the project (Example: If a suggestion on a project which uses advertisement on newspapers is made, specify the number of publication and target readers, and a method of ex-post measurement)

(Matters to be noted)

1. The purpose of production of submitted project should be described. Moreover, expressions of advertisement shall be created in traditional Chinese with Japanese translation.
2. In implementing the actual project, you shall comply with individual instruction by the Japan Tourism Agency and try to promote the effective and efficient Visit Japan Campaign by coordinating with the Japan National Tourism Organization (Japan Tourism Agency, the Japanese government) which is responsible for the project of "advertising in order to promote the visit of foreign tourists to Japan" based on the provision of Article 9, Paragraph 1 of the Act on the Japanese National Tourist Organization.

(3) Term of enforcement

From the day of contract to March 28, 2011

(4) Achievement

1) Project implementation report (approximately 50 pages, A4 size): 10

In Japanese.

※The form in Exhibit 2 is included in the report (The form is included on page 50)

2) The following productions shall be submitted

- Recording media containing various contents (e.g. CD-R): 3

- Recording media containing achievements (e.g. CD-R): 3

3) The digest-version of the productions shall be produced and submitted for the ex-post assessment (attitude change survey) after the completion of the project.

3. Content included in the project proposal

(1) Specific proposal concerning the content of project

1. Basic concept of the project

2. Matters which require explanation on the content of project

(2) Project implementation structure (Exhibit 3)

(3) Working process (Exhibit 4)

(4) Existence and schedule of recomission (however, limited to those that require the permission of the ordering party)

(5) Overview of corporation (Exhibit 5)

- Overview of corporation

- Name and contact of person in charge

(6) Reference quotation (approximate estimate) and its breakdown

The adopted party is required to submit an integral detailed statement in the buildup format of unit price x quantity.

(7) Qualification for participating in the competition

Please attach a copy of the notice of qualification examination result concerning the qualification for participating in the competition of the Ministry of Land, Infrastructure, Transport and Tourism in the fiscal years 2010, 2011 and 2012.

4. Submission of project proposal

(1) Time limit: 30.JULY 2010, 12 p.m.

(2) Method of submission: By hand or by mail (if you wish to send the project proposal by mail, it must arrive by the time limit and be sent as a registered item)

(3) Submitted to: International Tourism Promotion Division, Japan Tourism Agency, Ministry of Land, Infrastructure, Transport and Tourism

(4) Number of copies submitted: 7

5. Presentation

The preliminary selection and the secondary selection will be implemented in this competition. In the preliminary selection, documents are examined based on the submitted project proposals. In the secondary selection, an applicant of the relevant project proposal will give a presentation in addition to the content of project proposal. Only parties who have passed the preliminary selection are qualified to participate in the secondary selection. The time and venue will be notified separately only to those who are qualified.

6. Matters to be noted in implementing the competition

(1) Evaluation is performed based on the following standards. We will not accept any question concerning the allocation of marks of evaluation standards, etc.

1) Whether a party fully understands the purpose and content of the project

2) Whether the content suggested is innovative and persuasive

3) Whether the content suggested is concrete and appropriate

4) Whether the working process and the domestic and overseas structure are able to be implemented with certainty

(2) The language used for creating documents shall be Japanese and the currency shall be limited to Japanese Yen.

(3) The reference scale of project financed from the national treasury shall be up to 550 million yen (including the consumer tax). However, the format may be changed concerning expenses that should be paid at cost (e.g. airfare) based on the purpose and characteristics of expenses among the costs declared in the quotation after reviewing the record until the completion of project.

(4) If a project proposal does not arrive by the time limit, you are not allowed to participate in the competition.

(5) No replacement and resubmission of the project proposal are permitted. No change to the content of project proposal is permitted in principle even after the selection.

(6) A hearing may be held as necessary on the content of the submitted project proposal apart from the presentation (secondary selection).

(7) The costs for creating and submitting the project proposal shall be borne by the applicant.

(8) Although the winner of the competition is selected as the optimal party as a result of the competition, a contract relationship with the government does not occur until the completion of contract procedures based on the accounting laws.

(9) Project proposals that were not adopted are returned in principle. (We ask a proposer

who does not wish to have it returned to make a request of that effect in submitting the proposal to the implementation office)

(10) If there is not any suitable project proposal, the competition may be cancelled or another method may be adopted.

(11) A participant in the competition whose project proposal is adopted will be notified in writing the effect. In addition, other participants in the competition whose project proposal is not adopted will be notified in writing the effect and the reasons for loss. This notification of loss does not obstruct the enforcement of contract procedure practiced separately.

(12) As a result of the competition, the following matters will be published as soon as possible after the notification of adoption and will be notified at least until the contract conclusion day.

1) The name, address and name of representative of participant in the competition who submitted the adopted project proposal and date of decision

2) Evaluation scores and total scores by company and by evaluation item

(13) If your proposal is selected, you shall forward the project with sufficient consultation with staff of the department in charge. In order to grasp the progress of this project and a situation on expenditures, a working report in the pre-set format and a report of enforcement of expenditures are required to submit upon the direction of the ordering party.

(14) The copy right of productions produced under this contract shall belong to the Japan Tourism Agency, the Ministry of Land, Infrastructure, Transport and Tourism.

(15) Other matters the competition committee admits necessary.

Exhibit 1-1

PR Project for the Visit Japan Campaign in Taiwan in FY2010
Project Plan

1. Macro market environment

(1) The number of the Taiwanese people who visited Japan in 2008 slightly increased by 0.4% to 1.39 million comparing to the previous year. The steady increase because of the visa waiver program to visit Japan since 2005 and the expansion of flights since 2006 has slowed down. The number in 2009 also decreased by 26.3% to 1.02 million because of the economic recession and new influenza H1N1.

(2) The population of Taiwan has steadily increased, while the number of those who left the country peaked in 2007 and has decreased since 2008 because of the financial crisis (Population: 22.6 million in 2003 – 22.96 million in 2007 – 23.12 million in 2009, number of nationals leaving the country: 5.92 million in 2003 – 8.96 million in 2007 – 8.14 million in 2009)

(3) The Taiwanese economy is recovering from the financial crisis. While the economic growth rate of 2009 was -1.87%, it marked a high rate of 13.27% on a year-on-year basis in the first quarter in 2010.

(4) The number of employees was 10.45 million in May 2010 and this is an increase of 45 thousand compared with the previous month. It has recovered to the initial standard affected by the financial crisis in September 2008.

(5) Direct flights between mainland China have started to operate since July 2008 and 270 flights per week were offered in 2009. This means that there are more flights to China than to Japan. The number is still increasing in 2010.

(6) The service between Haneda Airport and Taipei Songshan Airport will commence at the end of October 2010.

2. Major competitors and their share (the share of Japan is 15.1%)

Mainland China (18.6%)

Hong Kong (27.8%)

Korea (4.8%)

Thailand (4.0%) *Based on the statistics of Japan

3. Issues of the promotion in FY2010

- (1) The number of the Taiwanese people leaving the country significantly decreased in 2009 and so did the number of tourists to Japan. However, the number of visitors to Korea and mainland China increased compared with the previous year. This means that they are shifting the destination to competing countries. Although the number of tourists to Japan from January ~ May 2010 has significantly recovered, it is necessary to clarify targets and strengthen different appeals by target in order to expand the share in the future.
- (2) Many Taiwanese people have traveled overseas and independent tours occupy 60% of the market. However, there are many who have not visited Japan. It is necessary, therefore, to accurately respond to sophisticated and diversified needs and appropriately reflect them in each aspect such as stimulation of motivation for the trip, presentation of tourist destinations and transmission of attractions of the trip to Japan in the promotion project based on the creation of demand for repeaters and the development of new demand for the trip to Japan.
- (3) There was a tendency in the past that the promotion mainly featured the golden route and Hokkaido as a tourist destination. Therefore, it is necessary to actively promote not only those areas but also local cities that are not widely recognized in Taiwan but have attractions as a tourism resource according to characteristics of each target taking into account the taste of Taiwanese tourists.
- (4) As a result of the evaluations based on the market survey on VJC Promotion implemented until 2009, issues such as “the concept of advertisement is unclear,” “Japan should actively involve in the enhancement of publicity of tourist information for overseas media,” and “the exposure of advertisement services is not frequent enough” have emerged.

4. Appeal targets

(1) The project will target the following two segments by generation and sex in order to appeal in an effective manner.

1) Males and females over 50 years old (mainly fixed and potential repeater demand)

(Characteristics) - Over 80% of males and females of this group have experienced the trip to Japan

- In particular, males tend to be a repeater

- General interest in the trip to Japan is relatively high, but the interest in mainland China is higher

2) Males and females in their 20's (fixed repeater demand)

(Characteristics) – The experience rate of overseas trip is high but only 50~60% have visited to Japan. Some of them are repeaters.

- Interest in the visit to Japan is higher than all other generations both for males and females

5. Menus of project implemented

The following projects will be implemented until the end of FY2010 within the range of budget. A suggestion on specific ideas for the content of implementing the project shall be made.

(1) Media mix in Taiwan

Media mix (advertisement using TV (placement of advertisement and provision of program theme upon the invitation by media), the Internet (construction and operation of a dedicated site, and placement of advertisement on other sites), newspapers and magazines (placement of advertisement and creation of articles upon the invitation by media) and advertisement in public transports) will be used in order to improve the degree of recognition of general consumers on the trip to Japan in Taiwan and to effectively appeal the trip to Japan to the targets described in 4. above. The media mix shall consist of the following two types of advertisement.

1) Media mix for improving the degree of recognition of general consumers on the trip to Japan using Tourism Nation Navigator “Arashi”

Advertisement will be posted for the purpose of improving the degree of recognition and stimulating the interests toward the entire market using advertisement materials with tourism nation navigator “Arashi” created separately in “Tourism PR and administration activities using tourism nation navigator” (hereinafter referred to as “the navigator work”) by the Japan Tourism Agency.

1) The following two types of material can be used

- Image materials for TV commercial (15, 20 and 30 seconds)
- Printed materials for print media

(Note 1) Image materials shall also be used for advertisement in public transport (image advertisement on billboards)

(Note 2) Materials must not be used for “poster advertisement using the outer surface of vehicles and airplanes,” “advertisement on the Internet (not permitted image nor still image)” and “tie-up advertisement (joint advertisement) of the trip to Japan with a third party such as local travel agencies and airlines”

2) The division of roles with the trustee business operator of "the navigator work" shall be as follows:

Range of work of the trustee business operator of "the navigator work"

- Creation of materials (however, they are not created newly upon a request by the trustee business operator of this project)
- Resize of materials generated by each media
- Management such as storage, rental, return and grasp of record of use in order to prevent secondary use
- Construction of the structure that enables to take an appropriate preventive measure if illegal use is found
- Coordination with the agency to which "Arashi" belongs concerning creation of materials

Range of work of the trustee business operators of this project

- Securing of media on which advertisement is placed
- Communication and coordination with an agency that places advertisement

(Note 3) The business operator of "the navigator work" bears full responsibility for the coordination with the agency to which "Arashi" belongs

3) In making a suggestion on media, note the following points with regard to the schedule.

- The business operator of this project shall make a realistic plan of placing advertisement taking into account the schedule of advertisement assessment necessary for securing media, because the said operator must receive materials from the trustee business operator of "the navigator work" after the adoption.
- At the moment, procedures concerning the hand over of materials are expected to be as follows. They shall be reflected on the schedule of submitting documents.

Adoption of the trustee business operator of this project (project proposal)

Submission of the schedule of submitting the adopted project proposal and the profile of prospect media (size, format, etc.) from the trustee business operator of this project to the trustee business operator of "the navigator work"

Provision of materials to be posted from the trustee business operator of "the navigator

work” to the trustee business operator of this project

4) Media used should be “media that is highly appealing in general” or “pages that attract a lot of attention” (e.g. front page of daily newspaper having a big circulation or similar pages) based on the fact that the purpose is to increase the degree of recognition of the general public on the trip to Japan.

In addition, in suggesting outdoor advertisement such as transportation advertisement, not only a type of advertisement but also a specific place the advertisement is to be placed should be suggested.

(Note 4) It is not allowed to contact in advance or refer to the agent of “Arashi” in making any suggestion.

2) Media mix in order to work on the target segment to visit Japan in the near future

Effectively appeal to the target segment and area as set in 4. by means of a newly formulated creative taking note of the following matters by combining the optimal media in terms of effect for each media.

1) 2 Common matters to targets

- Media mix shall be placed to effectively appeal the trip to Japan and combine all or a part of media such as TV, the Web (construction and management of sites, advertisement on the Web), newspapers, magazines and advertisement in transportation. In doing so, more effective methods such as advertisement, advertisement of articles and placement of articles upon the invitation by media should be combined.

- Natural sceneries, historical and cultural buildings, food and shopping in Japan shall be used effectively to try to secure the exposure based on the local viewpoint (taste and likes of the Taiwanese people)

- The communication plan should be until the end of fiscal year and try to focus on the most effective time based on the trend of travel season in Taiwan

- Advertisement should be placed at an effective time as the Taiwanese people have a style of travelling with family.

- Tie up such as joint advertisement should be used as much as possible not only with local travel agencies but also Japanese companies in different fields and related companies with the trip to Japan

- The concept of appeal to each segment should not deviate from the content of a new logo of the Visit Japan Campaign "Japan Endless Discovery" (Concept for each segment should be constructed under the idea of "Japan Endless Discovery")
- Travel reservations in Taiwan are mainly made (about 70%) through travel agencies (at counters or on the Web). Therefore, an effective appeal method through travel agencies should be included
- Specifically utilize the Internet (including word of mouth such as blogs) and travel magazines because they are main tools to collect information in Taiwan

2) Males and females in their 20's (development of new demand and potential repeater demand)

- They are more interested in Japanese pop culture (animation, comic) and shopping than other generations in addition to natural sceneries and Japanese food. This factor should be taken into account

3) Males and females over 50 years old (potential and fixed repeater demand)

The proposal of project should be made taking into account the fact that they mainly travel as a couple or family

3 Visit Japan Promotion utilizing the following opportunities should be suggested

- 1) Onset of air services between Haneda Airport and Taipei SongShan Airport at the end of October
- 2) 2010 Taipei International Flora Expo held in Taipei from November

6. Reference budget

The maximum budget shall be 550 million yen. However, the part related to 5.(1)① shall be over 100 million yen.

Precautions in submitting the project proposal for the competition

In order to ensure anonymity of submitters of project proposal in the competition and to further enhance fairness and transparency, the method of filling out the project proposal shall be set as follows.

Project proposal for storing and submitting to the Board of Audit of Japan

- 1 Original with the name of company (including all documents submitted with the seals of company and its representative) . . . For submission to the Board of Audit of Japan
 - 2 Copy of the original . . . For storage
- * One of the original and the copy should be submitted using an closed envelope with the company's name

Project Proposal for Review

- 1 Project proposal including the matters to be reviewed such as concept and content

Five proposals should be submitted in the format that the company's name of the submitter does not appear on the front cover and in the text.

Please add a quotation and an organization chart (created for indicating the structure of number of staff, division of roles, etc.) without the company's name and personal name among the documents enclosed in 2.

- 2 Five documents that are able to identify a submitter such as an organization chart of project, profile and major business background of person in charge, existence of recommission, overview of the corporation and a quotation should be submitted in another enclosed envelope to 1.
- 3 Documents may be opened before adopting the contractor in the process of review if a request is made from a member and approved by the chairman in a case where the difference of evaluation scores is very minor.
- 4 Number of item (e.g. 2. (3) ①— 1) provided in the competition instructions that shall be described is quoted in the corresponding content. The number of pages per item shall be limited to five.

Format of project proposal for review

Paper : The front cover is in principle A4-longitudinal, but A4-horizontal pages with figures and drawings may be inserted.

If an effective quote is A4-horizontal in the software used, it is accepted.

Font : MS Mincho (Century or MS Gothic for English) and 12 points are used in principle. However, an effective quote in the software used is other than 12 points, it may be changed as necessary.

- * Please formulate the project proposal based on the concept of this precaution that prevents a submitter from being identified by quote of the proposal in order to secure a fair review.
