

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Import Vehicles

|                       |   |      |               |
|-----------------------|---|------|---------------|
| CAMPAIGN NO.          | 2553  | DATE | June 10 ,2010 |
| MANUFACTURER          | ISUZU MOTORS LIMITED  |      |               |
| DESCRIPTION OF DEFECT | <p>(1)In the alarming horn switch wiring, the wiring arrangement has been inadequate. Consequently, the wiring may be discontinued after the repeated operation of the steering wheel. In the worst case, the horn may fail to honk.</p> <p>(2)In the left tire of the rear wheels, there is inadequate clearance between the left tire of the rear wheels and the brake hose bracket bolt. If vehicles mounted with a body with high center of gravity make a hard turn, the bolt may rub against the side of the tire.</p> <p>(3) In the rear cab mount bracket, the U-shaped hook to hold the cab temporarily in cab tilting has been inadequately welded. The welding may come off by impact when the cab is pulled down. If it is used as is, the hook may drop off in the worst case.</p> |      |               |
