

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic/Import Vehicles

CAMPAIGN No.	2620	DATE	Oct.14.2010
MANUFACTURER	Hino Motors, Ltd.		
DESCRIPTION OF DEFECT	On certain trucks and buses with full air brake system, due to inadequate heat-treatment, the roller contact surface of the tappet in the wedge and roller assembly of the wheel cylinder could be worn and dented at the early stage. This can cause the wedge and roller assembly function inaccurately resulting in a decrease of braking force.
