

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	2654	DATE	Nov.17.2010
MANUFACTURER	TOYOTA		
DESCRIPTION OF DEFECT	In the vehicles equipped with the Toyota dealer optional washer fluid heater, due to insufficient lap length of the O-ring for preventing the fluid from leaking from the heater, there is a possibility that the washer fluid may penetrate into the space in which the heater control circuit is located. This condition could cause the control circuit to burn out, and in the worst case, result in fire.
