

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	2692	DATE	Jan. 20 2011
MUNUFACTURER	Mitsubishi Fuso Truck and Bus Corporation		
DESCRIPTION OF DEFECT	<p>Since the fault diagnosis tool software program developed at the design stage of the applicable vehicles has been defective, the data stored in the common drive system control computer may be erroneously initialized when the tool is used. This may cause problems such as malfunction of auto cruise and engine auxiliary brake systems, hill start assist system not being cancelled, etc.</p> <p>Also, the torque cutoff may not operate in low gear speeds. Therefore, if the vehicle continues to be used in this condition, the transmission and differential gears may break. In the worst case, the vehicle will become unable to drive.</p>		

TYPE	COMMERCIAL NAME	MODEL YEAR RECALLED	NUMBER OF VEHICLE	
LDG-FP54VDR	FUSO	2009	1	
LDG-FS55VZ		2009	1
