

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic/Import Vehicles

CAMPAIGN No.	2884	DATE	Jan.25.2012
MANUFACTURER	Hino Motors, Ltd.		
DESCRIPTION OF DEFECT	On certain light duty trucks, due to improper processing location of the notches on the steering wheel boss, which are used to position the combination switch, there is a possibility that stiff stress may be applied to the wiring harness for the horn routed between the steering wheel and the switch. If the vehicle is continuously operated in this condition, the wiring harness may open circuit, which could result in the horn becoming inoperative.
