

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Import Vehicles

CAMPAIGN NO.	2967	DATE	July 12 ,2012
MANUFACTURER	ISUZU MOTORS LIMITED		
DESCRIPTION OF DEFECT	<p>Due to an improper circuitry, the ignition switches of the light and mid-duty trucks might have their contact points abraded by starting current for transmission controlling units and/or aftermarket electric components. If any of the trucks is driven under such a condition, the switch function becomes unstable which leads to slow engine start.</p> <p>If the truck is equipped with an automatic transmission or an automatic mechanical transmission (Smoother), there is a possibility that such troubles as an engine stall and lighting malfunction would occur.</p>
