

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

|                       |   |      |              |
|-----------------------|---|------|--------------|
| CAMPAIGN No.          | 3038  | DATE | Oct. 11 2012 |
| MUNUFACTURER          | Mitsubishi Fuso Truck and Bus Corporation   |      |              |
| DESCRIPTION OF DEFECT | On heavy-duty trucks, the snow accumulated at the inside and outside of the front panel may melt due to the heat of the heater hose, etc., drip on the brake force adjusting valve (for front axle) for the collision mitigation brake, and freeze over the valve to block the discharge port of the valve. This may make it impossible to release the front brakes. In this condition, the truck would not start off, or the truck may run with the front brakes dragged. Driving with the brakes dragged will, in the worst case, result in fire. |      |              |

| TYPE       | COMMERCIAL NAME | MODEL YEAR RECALLED | NUMBER OF VEHICLE |
|------------|-----------------|---------------------|-------------------|
