

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	3 1 0 7	DATE	Feb.21.2013
MANUFACTURER	N I S S A N		
DESCRIPTION OF DEFECT	<p>On the Six-speed Automatic Mechanical Transmission,</p> <p>① Due to inappropriate shape of the oil pan on the engine, water may enter into the transmission through the joining area of the engine and the transmission. This can cause the parts for the operation of the clutch to rust and stick, and a clutch drag may occur. Therefore, the warning lamp may turn on and the transmission may not operate correctly.</p> <p>② Due to inappropriate tightening of the bolt between the shaft to select and the jointing part of the select motor, the bolt may loosen and the play can be made. As a result, the shift stroke may become inaccurate and the shift position may be out of the correct position. Therefore, the warning lamp may turn on and the transmission may not operate correctly.</p> <p>③ Due to the insufficient strength, the bush on the clutch disc may break by the continual operation of the clutch. If a fragment of broken bush is caught between the clutch disc and the clutch cover, a clutch drag may occur. Therefore, the warning lamp may turn on and the transmission may not operate correctly.</p> <p>④ Due to inappropriate program for the clutch actuator control, the overcurrent may run in the motor of the clutch actuator during the clutch operation and the motor will heat up. This may cause the weld sticking of the brush in the motor and the clutch cannot operate. Therefore, the warning lamp may turn on and the transmission may not operate correctly.</p>		

TYPE	COMMERCIAL NAME	MODEL YEAR RECALLED	NUMBER OF VEHICLES
PDG-SZ2F24 PKG-SZ2F24	「NISSAN ATLAS」	2007 ~ 2011	1,779
PDG-SZ1F24 PKG-SZ1F24		46
