

VEHICLE SAFETY RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	3162	DATE	Jun 7, 2013
MANUFACTURER	SUZUKI MOTOR CORPORATION		
DESCRIPTION OF DEFECT	Evaporator of the air-conditioner has possibility to get a corrosion pore starting from inside of it due to the improper production method depending on combination with some compressors, ending up to leakage of coolant and lubricant. With the pore the air-conditioner becomes ineffective. In the worst case the compressor shall be locked with insufficient lubrication and that could cause engine stall while running with a slow speed.
