

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	3217	DATE	Sep. 5 2013
MUNUFACTURER	Mitsubishi Fuso Truck and Bus Corporation		
DESCRIPTION OF DEFECT	<p>① In some small trucks and busses equipped with a dual-clutch mechanical automatic transmission, the fastening force of the oil cooler hose at the connection to the transmission is not sufficient. If the vehicle continues to be used under this condition, the hose may come off and cause transmission oil leakage, making it impossible to shift gears and drive the vehicle.</p> <p>② In some small trucks and large busses, the locking mechanism in the driver's or passenger's seat belt winding device has a defect of the press-fit part becoming loose due to an inappropriate manufacturing method. This may cause an abnormal noise or sticking when fastening or releasing the seat belt. If the vehicle continues to be used in this condition, the press-fit part may come off, in the worst case, causing a failure of the seat belt to be locked in the event of a crash.</p>		

TYPE	COMMERCIAL NAME	MODEL YEAR RECALLED	NUMBER OF VEHICLE
SKG-FBA00	「FUSO CANTER」	2012	1
SKG-FBA20		2010~2011	2
