

TIRE SAFETY RECALL CAMPAIGN IN JAPAN

Domestic Tires

CAMPAIGN No.	No. 6	DATE 2012 May. 17 th .	
MANUFACTURER	Sumitomo Rubber Industries, LTD		
DESCRIPTION OF DEFECT	Owing to partially unsuitable manufacturing process of bus & truck tyres, some tires have thinner inner rubber at the limited inner area of tyre. This thinner inner rubber may result in small crack and inner air will go toward outside through it and this air will cause outer sidewall area to inflate in some case. Consequently, the crack may occur at this area and air will possibly leak from it by continuous vehicle running.
