

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic/Import Vehicles

CAMPAIGN No.	3245	DATE	Oct.22.2013
MANUFACTURER	Hino Motors, Ltd.		
DESCRIPTION OF DEFECT	<p>On certain heavy duty city buses, due to inadequate program of engine control, with the automatic regeneration of DPR (Diesel Particulate Active Reduction system) while the bus is stopped, the fuel by post injection is flowed into EGR (Exhaust Gas Recirculation) piping and cooled by EGR cooler, and the deposition of carbon is formed and accumulated inside the EGR cooler, resulting in the blocking up of EGR cooler by the deposition of carbon. If the vehicle is operated under the conditions continuously, the blades of turbocharger can be defective, resulting in lighting of the engine check lamp and lack of power for the smooth running of the vehicle.</p>
