## VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Import Vehicle

CAMPAIGN No.3314DATEFeb. 28, 2014MANUFACTURERKOBELCO CRANES CO.,LTDDESCRIPTION OFBecause shape of the oil pressure pipeline and its arrangement are inappropriate, in the power transmission device in a driving mood, hydraulic oil may leak from a cracked portion of the pipes by receiving a continuous stress due to the oil pressure pulsation. Therefore, the oil pressure in hydraulic pipes will be lost when continuously being used under this condition. In the worst case, a crack propagates and might not be able to drive because of not being able to transmit the power with the hydraulic oil.						
DESCRIPTION OF DEFECTBecause shape of the oil pressure pipeline and its arrangement are inappropriate, in the power transmission device in a driving mood, hydraulic oil may leak from a cracked portion of the pipes by receiving a continuous stress due to the oil pressure pulsation. Therefore, the oil pressure in hydraulic pipes will be lost when continuously being used under this condition. In the worst case, a crack propagates and might not be able to drive because of not being able to transmit the power with the	CAMPAIGN No.	3314	DATE	Feb. 28, 2014
