

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic / Import Vehicles

CAMPAIGN NO.	3340	DATE	April 10 ,2014
MANUFACTURER		ISUZU MOTORS LIMITED	
DESCRIPTION OF DEFECT		<p>In the bus with automatic transmission installed, the durability of the automatic transmission control unit against heat was found to be insufficient and thus a crack could occur in some cases, on the welding fixing the elements inside of the unit. If the vehicle was continuously used under such situation, the crack could get enlarged, the electrical conductivity could be lost, dysfunctions in shifting of gear could occur, and in the worst case scenario, the tire could get locked or the re-starting of the engine could become impossible.</p>
