Concept:
- Logistic Hub system can provide solutions for the transportation in the Pre-salt area between coast and offshore platforms.
- High Speed Vessels (HSV) for Coast connection
- Offshore platforms to Hub connection by helicopters
Logistic Hub System for offshore development

Functions:

- **Transportation hub**
  - Heliport (takeoff and landing / fueling), helicopter hanger/elevator
  - Air traffic control tower, air surveillance radar, airway beacon
  - Berth for safe and efficient transfer of workers and cargo
  - Cargo storage (fuel, food etc.)
  - Accommodation
  - Workshop for maintenance

- **Offshore disaster response base**
  - Oil fence, oil treatment, oil adsorbent
  - Fire extinguishant
  - Medical facility
