

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

|                       |  |      |              |
|-----------------------|--|------|--------------|
| CAMPAIGN No.          | 3363   | DATE | June 12,2014 |
| MANUFACTURER          | MITSUBISHI MOTORS CORPORATION  |      |              |
| DESCRIPTION OF DEFECT | Due to inappropriate structure of the base for the lighting switch platform, there may be the part where crack occurs in the soldering between the base and the platform caused by the repeated heating cycle of expansion and contraction. In the worst case scenario, the cracked portion could cause a temporal continuity failure resulting in the situation where the head lamps and/or turn signal lamps do not turn on. |      |              |
