

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic / Import Vehicles

CAMPAIGN No.	3459	DATE	November 7.2014
MANUFACTURER	YANMAR CO.,LTD.		
DESCRIPTION OF DEFECT	In the transmission of agricultural tractors with rear crawlers on, there is a possibility that the reverser shaft is cracked during the heavy towing operation because of the insufficient strength of the shaft. If the customer keeps operating the unit, the crack goes deeper and deeper. In the worst case, the shaft is broken and the unit becomes unable to be driven.
