|------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|--------------------------|
| CAMPAIGN No. | 3503 | DATE | February 19, 2015 |
| MANUFACTURER | SUZUKI MOTOR CORPORATION | | |
| DESCRIPTION OF DEFECT | Some vehicles may have a part only with insufficient strength inside the front door latch and/ or the rear end door latch due to improper material used in the manufacturing. Therefore repetitive lock/ unlock operation can break the part resulting in unable lock/ unlock function. In the worst case the vehicle occupants could not open the doors. | | |
