

VEHICLE SAFETY RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	3559	DATE	April 22, 2015
MANUFACTURER	SUZUKI MOTOR CORPORATION		
DESCRIPTION OF DEFECT	<p>Grease applied at the contact point of the ignition switch may carbonize with heat repeatedly generated from arc discharge when the travelling side leaves from the fixed side at the contact point, due to the very grease being improper for the contact point. If the vehicle is used continuously as it is, the grease can make smoke due to heat from unexpected conduction of the switch with grease deterioration of insulation performance and abrasion powder accumulated around the contact point. In the worst case a fire might be induced.</p>
