

VEHICLE SAFETY RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	3611	DATE	Jul 23, 2015
MANUFACTURER	SUZUKI MOTOR CORPORATION		
DESCRIPTION OF DEFECT	<p>Resin fragments could be created inside of Brake Hydraulic Control Unit during press fitting assembly process, due to improper shape of components.</p> <p>Therefore, they might be stuck in hydraulic control valve and it might cause a loss of vehicle stability due to delay of pressure control when the Anti-Lock Brake System (ABS) is activated.</p>
