

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic/Import Vehicles

CAMPAIGN No.	3662	DATE	Oct.21.2015
MANUFACTURER	Hino Motors, Ltd.		
DESCRIPTION OF DEFECT	(1)In the DPR (Diesel Particulate Active Reduction system) of the subject vehicles, due to improper seal structure at the electrical fuel cutoff valve, there is a possibility that water could intrude from the contact surface between the waterproof cap and the cutoff valve body. If this occurs, the coil wire in the cutoff valve could have a short-circuit or disconnection and the warning light illuminates, causing the resin component to have a damage by heat generation at the coil, in the worst case, resulting in fuel leakage from the cutoff valve. (2)In the automatic clutch unit of the mechanical automatic transmission, ①due to improper routing of the electric wire harness connected to the operational motor, there is a possibility that the waterproof grommet could become deformed causing the water to intrude into the motor. If this occurs, the motor brush could not move smoothly and the warning light illuminates. In the worst case, the motor could seize and the clutch may not operate, resulting in the vehicle becoming inoperative. ②due to improper routing of the lead wire connected to the motor brush in the motor, there is a possibility that the lead wire could catch on the guide. If this occurs, the motor brush could not move smoothly leading to conduction failure. In the worst case, the motor could not operate, resulting in the vehicle becoming inoperative. ③due to the inadequate control program, if the vehicle is frequently started and stopped, the brush of the operational motor could wear prematurely. (3) In the passenger side manual adjusted outer rearview mirror assembly of the route van, due to the improper fixing method between mirror and the mirror assembly body, there is a possibility that the claw fixing the mirror to the body could wear by vibration while driving and eventually may break. In the worst case, the mirror could be detached and the driver cannot confirm rearward traffic conditions.
