

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic/Import Vehicles

CAMPAIGN No.	3663	DATE	Oct.21.2015
MANUFACTURER	Hino Motors, Ltd.		
DESCRIPTION OF DEFECT	In the DPR (Diesel Particulate Active Reduction system) of the subject vehicles, due to improper seal structure at the electrical fuel cutoff valve, there is a possibility that water could intrude from the contact surface between the waterproof cap and the cutoff valve body. If this occurs, the coil wire in the cutoff valve could have a short-circuit or disconnection and the warning light illuminates, causing the resin component to have a damage by heat generation at the coil, in the worst case, resulting in fuel leakage from the cutoff valve.
