

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	3643	DATE	October 16, 2015
MANUFACTURER	Mazda Motor Corporation		
DESCRIPTION OF DEFECT	Because excessive amount of grease at the contact point inside the ignition switch was applied, the grease may carbonize and accumulate between a movable contact and a fixed contact due to arc discharge heat happened in operating the switch, so that insulation performance inside the switch may deteriorate. Therefore, continuous use may lead the contact points to be conductive, and the switch to generate and smoke, in the worst case, resulting in a fire.
