

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic / Import Vehicles

CAMPAIGN No.	Gai-2251	DATE	2015/10/15
MANUFACTURE	Daimler AG (Japanese Importer : Mercedes-Benz Japan Co., Ltd.)		
DESCRIPTION OF DEFECT	Daimler AG became aware through its world wide product observation that on certain vehicles with 4 cylinder diesel engine (OM651), material tolerances of a gasket can lead to oil leakage at the chain tensioner. If the oil level in the engine drops below the minimum level, a message appears in the display depending on the defined driving status. However, the loss of larger quantities of engine oil might lead to engine damage and might pose a threat to following traffic. The risk of ignition of leaking oil cannot be excluded.
