

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic / Import Vehicles

CAMPAIGN No.	3653	DATE	7 October, 2015
MANUFACTURER	KYOKUTO KAIHATSU KOGYO CO. LTD.		
DESCRIPTION OF DEFECT	The manufacturing instructions for the connecting flange were inappropriate on the hydraulic pump fitted as operating equipment for car carriers designed for carrying one vehicle. As a consequence, the position of the installation hole of the set screw holding the connecting flange and the oil pump shaft differed from the design on some vehicles. Due the above, the set screw can work loose due to vibrations etc. during travel, and if the equipment were continued to be used unchanged, there is a risk that the connecting flange will fall out and the shaft will detach, causing a hazard to other traffic.
