

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Import Vehicles

CAMPAIGN NO.	3719	DATE	December 10 ,2015
MANUFACTURER		ISUZU MOTORS LIMITED	
DESCRIPTION OF DEFECT		Regarding engines for heavy-duty trucks, a crack may initiate on some pistons when they are placed under excessive load from high temperature because of improper temperature setting for opening the thermo valve. Hence, if a truck with this problem is used continuously, the crack may further advance, opening a hole on the piston, and resulting in low engine power and white smoke. And in the worst case, the affected vehicle could be rendered immobilized.
