

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	3665	DATE	Dec.10 2015
MUNUFACTURER	Mitsubishi Fuso Truck and Bus Corporation		
DESCRIPTION OF DEFECT	<p>Regarding heavy-duty truck and bus engines:</p> <p>(1) Since the engine oil replacement intervals have been set inappropriately, the engine oil may deteriorate earlier than expected under severe operating conditions. Continued use of the vehicle may cause accumulation of sludge (soot and deteriorated oil formed during combustion) in the oil mist separator, leading to clogging of the oil mist separator. This will cause an increase in the crankcase inner pressure and result in engine oil flowing into the intake system. In the worst case, an unintended increase in the engine speed will occur, and the engine will be damaged.</p> <p>(2) Due to the variations in manufacturing of oil pumps, some pumps may have a slanted gear shaft. This may cause early wear of gear teeth surfaces. Continued use of the vehicle may cause breakage of gears and a drop in the supply oil pressure to the engine. In the worst case, the vehicle will become unable to operate due to engine seizure, or a fire will occur.</p>		

TYPE	COMMERCIAL NAME	MODEL YEAR RECALLED	NUMBER OF VEHICLE
LDG-FU50VY	「FUSO SUPER GREAT」	2010~2011	8
