

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

~~Domestic~~ Import Vehicles

CAMPAIGN No.	3816	DATE	May. 26. 2016
MANUFACTURER	Hino Motors, Ltd.		
DESCRIPTION OF DEFECT	On certain heavy duty trucks equipped with the engine of E13C type, because the program of engine control and the shape of the rocker arms for intake valves are inadequate, the deposition of carbon may adhere to the intake valves, causing the intake valve guides to wear out. Therefore, if it is continued to be used under the condition, an abnormal noise and vibration may occur due to the interference between the valves and the cylinder liners, resulting the valves to break and the engine to stop in the worst case.
