

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

~~Domestic~~ Import Vehicles

CAMPAIGN No.	3841	DATE	Jun. 30. 2016
MANUFACTURER	Hino Motors, Ltd.		
DESCRIPTION OF DEFECT	On certain medium duty trucks, heavy and medium duty buses, as the strength of the welding part of the internal arm and the shaft which operates the variable nozzles of the engine turbocharger is insufficient, the welding part concerned may be twisted by the drive of the actuator, which may cause the variable nozzles to move a little. Therefore there is a possibility that the intake air amount becomes insufficient, causing the engine output to decline and the engine speed to be unstable, resulting the engine to stall while driving and the vehicle unable to restart in the worst case.
