

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	3 8 4 8	DATE	July.7.2016
MANUFACTURER	N I S S A N		
DESCRIPTION OF DEFECT	<p>In the Hybrid Power train Control Module (HPCM) of the hybrid car, because the control program of the high voltage cooling system is inappropriate, the temperature such as drive motors etc. may rise when the electric water pump had trouble. For the reason, if the vehicle continues to be driven in this condition, in an extreme case, overheat protection control operates, and an engine and a drive motor stop and the power is not transmitted, and the vehicle might not be able to drive.</p>
